Artificial Intelligence MCQs

Week 1

Q1. Which concept best matches this definition: computer systems performing tasks associated with human intelligence?

A) Alan Turing

B) Artificial Intelligence

C) Turing Test

D) AI Hallucination

Correct answer: B) Artificial Intelligence

WHY: Artificial Intelligence means computer systems performing tasks associated with human intelligence. Roman Urdu: Is definition ka central idea Artificial Intelligence hai.

MENTAL MODEL: AI is the broad umbrella for intelligent tasks.

Q2. Which concept is BEST illustrated by this situation: an assistant answers questions in natural language?

A) Alan Turing

B) Robotics

C) Artificial Intelligence

D) Human-in-the-loop

Correct answer: C) Artificial Intelligence

WHY: This situation is an example of Artificial Intelligence. The key concept is: computer systems performing tasks associated with human intelligence. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: AI is the broad umbrella for intelligent tasks.

Q3. Which concept best matches this definition: methods that learn patterns from data rather than relying only on explicit rules?

A) Machine Learning

B) Inference

C) Artificial Intelligence

D) Alan Turing

Correct answer: A) Machine Learning

WHY: Machine Learning means methods that learn patterns from data rather than relying only on explicit rules. Roman Urdu: Is definition ka central idea Machine Learning hai.

MENTAL MODEL: ML learns from examples like a student.

Q4. Which concept is BEST illustrated by this situation: a spam filter learns from labeled emails?

A) Machine Learning

B) Computer Vision

C) Supervised Learning

D) AI Project Lifecycle

Correct answer: A) Machine Learning

WHY: This situation is an example of Machine Learning. The key concept is: methods that learn patterns from data rather than relying only on explicit rules. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: ML learns from examples like a student.

Q5. Which concept best matches this definition: machine learning based on neural networks with many processing layers?

A) Unsupervised Learning

B) Alan Turing

C) Deep Learning

D) AI Hallucination

Correct answer: C) Deep Learning

WHY: Deep Learning means machine learning based on neural networks with many processing layers. Roman Urdu: Is definition ka central idea Deep Learning hai.

MENTAL MODEL: Layers are successive filters refining a signal.

Q6. Which concept is BEST illustrated by this situation: a multilayer neural network recognizes speech?

A) Deep Learning

B) Inference

C) AI in Healthcare

D) AI Hallucination

Correct answer: A) Deep Learning

WHY: This situation is an example of Deep Learning. The key concept is: machine learning based on neural networks with many processing layers. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Layers are successive filters refining a signal.

Q7. Which concept best matches this definition: artificial intelligence specialized for particular tasks?

A) Narrow AI

B) Dartmouth Workshop 1956

C) AI Hallucination

D) Artificial General Intelligence

Correct answer: A) Narrow AI

WHY: Narrow AI means artificial intelligence specialized for particular tasks. Roman Urdu: Is definition ka central idea Narrow AI hai.

MENTAL MODEL: A specialist rather than an all-rounder.

Q8. Which concept is BEST illustrated by this situation: a chess engine plays chess but cannot run a hospital?

A) AI in Banking

B) Robotics

C) Narrow AI

D) Natural Language Processing

Correct answer: C) Narrow AI

WHY: This situation is an example of Narrow AI. The key concept is: artificial intelligence specialized for particular tasks. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A specialist rather than an all-rounder.

Q9. Which concept best matches this definition: hypothetical AI able to perform broadly across intellectual tasks?

A) Turing Test

B) Artificial General Intelligence

C) Alan Turing

D) Robotics

Correct answer: B) Artificial General Intelligence

WHY: Artificial General Intelligence means hypothetical AI able to perform broadly across intellectual tasks. Roman Urdu: Is definition ka central idea Artificial General Intelligence hai.

MENTAL MODEL: A generalist that can learn many jobs.

Q10. Which concept is BEST illustrated by this situation: a proposed system could transfer reasoning across unrelated domains?

A) Artificial General Intelligence

B) Generative AI

C) Dartmouth Workshop 1956

D) Turing Test

Correct answer: A) Artificial General Intelligence

WHY: This situation is an example of Artificial General Intelligence. The key concept is: hypothetical AI able to perform broadly across intellectual tasks. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A generalist that can learn many jobs.

Q11. Which concept best matches this definition: aI methods for processing and generating human language?

A) AI in Healthcare

B) Natural Language Processing

C) Training Data

D) Generative AI

Correct answer: B) Natural Language Processing

WHY: Natural Language Processing means aI methods for processing and generating human language. Roman Urdu: Is definition ka central idea Natural Language Processing hai.

MENTAL MODEL: NLP is the language department.

Q12. Which concept is BEST illustrated by this situation: a system classifies customer reviews by sentiment?

A) Inference

B) Reinforcement Learning

C) Machine Learning

D) Natural Language Processing

Correct answer: D) Natural Language Processing

WHY: This situation is an example of Natural Language Processing. The key concept is: aI methods for processing and generating human language. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: NLP is the language department.

Q13. Which concept best matches this definition: aI methods for extracting information from visual data?

A) Computer Vision

B) Unsupervised Learning

C) Supervised Learning

D) Deep Learning

Correct answer: A) Computer Vision

WHY: Computer Vision means aI methods for extracting information from visual data. Roman Urdu: Is definition ka central idea Computer Vision hai.

MENTAL MODEL: Computer vision is machine eyesight.

Q14. Which concept is BEST illustrated by this situation: a camera system detects defective products?

A) Robotics

B) Unsupervised Learning

C) Training Data

D) Computer Vision

Correct answer: D) Computer Vision

WHY: This situation is an example of Computer Vision. The key concept is: aI methods for extracting information from visual data. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Computer vision is machine eyesight.

Q15. Which concept best matches this definition: models that produce new content from learned patterns?

A) Machine Learning

B) Natural Language Processing

C) Generative AI

D) Reinforcement Learning

Correct answer: C) Generative AI

WHY: Generative AI means models that produce new content from learned patterns. Roman Urdu: Is definition ka central idea Generative AI hai.

MENTAL MODEL: A creator rather than just a classifier.

Q16. Which concept is BEST illustrated by this situation: a tool drafts a fresh marketing email?

A) John McCarthy

B) Dartmouth Workshop 1956

C) Machine Learning

D) Generative AI

Correct answer: D) Generative AI

WHY: This situation is an example of Generative AI. The key concept is: models that produce new content from learned patterns. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A creator rather than just a classifier.

Q17. Which concept best matches this definition: a rule-based system using encoded domain expertise?

A) Expert System

B) AI Hallucination

C) AI in Healthcare

D) Turing Test

Correct answer: A) Expert System

WHY: Expert System means a rule-based system using encoded domain expertise. Roman Urdu: Is definition ka central idea Expert System hai.

MENTAL MODEL: A digital rulebook of expert knowledge.

Q18. Which concept is BEST illustrated by this situation: a rule engine recommends troubleshooting steps?

A) Unsupervised Learning

B) Dartmouth Workshop 1956

C) Expert System

D) AI Project Lifecycle

Correct answer: C) Expert System

WHY: This situation is an example of Expert System. The key concept is: a rule-based system using encoded domain expertise. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A digital rulebook of expert knowledge.

Q19. Which concept best matches this definition: engineering intelligent systems that sense and act in the physical world?

A) AI Hallucination

B) Robotics

C) Alan Turing

D) Dartmouth Workshop 1956

Correct answer: B) Robotics

WHY: Robotics means engineering intelligent systems that sense and act in the physical world. Roman Urdu: Is definition ka central idea Robotics hai.

MENTAL MODEL: Robotics gives software a physical body.

Q20. Which concept is BEST illustrated by this situation: a warehouse robot moves parcels?

A) Artificial Intelligence

B) Robotics

C) Unsupervised Learning

D) Training Data

Correct answer: B) Robotics

WHY: This situation is an example of Robotics. The key concept is: engineering intelligent systems that sense and act in the physical world. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Robotics gives software a physical body.

Q21. Which concept best matches this definition: researcher associated with coining the term artificial intelligence?

A) Natural Language Processing

B) John McCarthy

C) Human-in-the-loop

D) Alan Turing

Correct answer: B) John McCarthy

WHY: John McCarthy means researcher associated with coining the term artificial intelligence. Roman Urdu: Is definition ka central idea John McCarthy hai.

MENTAL MODEL: Remember McCarthy with the AI name.

Q22. Which concept is BEST illustrated by this situation: a history question asks who named the AI field?

A) AI in Healthcare

B) Turing Test

C) John McCarthy

D) Human-in-the-loop

Correct answer: C) John McCarthy

WHY: This situation is an example of John McCarthy. The key concept is: researcher associated with coining the term artificial intelligence. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Remember McCarthy with the AI name.

Q23. Which concept best matches this definition: foundational summer research event for artificial intelligence?

A) Algorithmic Bias

B) Artificial General Intelligence

C) Narrow AI

D) Dartmouth Workshop 1956

Correct answer: D) Dartmouth Workshop 1956

WHY: Dartmouth Workshop 1956 means foundational summer research event for artificial intelligence. Roman Urdu: Is definition ka central idea Dartmouth Workshop 1956 hai.

MENTAL MODEL: 1956 is a milestone on the AI timeline.

Q24. Which concept is BEST illustrated by this situation: a timeline places an AI workshop in 1956?

A) Robotics

B) Human-in-the-loop

C) Dartmouth Workshop 1956

D) Generative AI

Correct answer: C) Dartmouth Workshop 1956

WHY: This situation is an example of Dartmouth Workshop 1956. The key concept is: foundational summer research event for artificial intelligence. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: 1956 is a milestone on the AI timeline.

Q25. Which concept best matches this definition: researcher who proposed the imitation game for machine intelligence?

A) Algorithmic Bias

B) Alan Turing

C) Natural Language Processing

D) Turing Test

Correct answer: B) Alan Turing

WHY: Alan Turing means researcher who proposed the imitation game for machine intelligence. Roman Urdu: Is definition ka central idea Alan Turing hai.

MENTAL MODEL: Turing asks whether conversation can imitate a human.

Q26. Which concept is BEST illustrated by this situation: a class discusses the Turing test?

A) Expert System

B) Robotics

C) Turing Test

D) Alan Turing

Correct answer: D) Alan Turing

WHY: This situation is an example of Alan Turing. The key concept is: researcher who proposed the imitation game for machine intelligence. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Turing asks whether conversation can imitate a human.

Q27. Which concept best matches this definition: a conversational test concerning machine imitation of human responses?

A) AI Project Lifecycle

B) Turing Test

C) Expert System

D) Training Data

Correct answer: B) Turing Test

WHY: Turing Test means a conversational test concerning machine imitation of human responses. Roman Urdu: Is definition ka central idea Turing Test hai.

MENTAL MODEL: Judge the conversation, not the machinery.

Q28. Which concept is BEST illustrated by this situation: an evaluator chats with hidden human and machine participants?

A) Turing Test

B) Dartmouth Workshop 1956

C) Training Data

D) Generative AI

Correct answer: A) Turing Test

WHY: This situation is an example of Turing Test. The key concept is: a conversational test concerning machine imitation of human responses. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Judge the conversation, not the machinery.

Q29. Which concept best matches this definition: learning from examples paired with target labels?

A) Supervised Learning

B) Unsupervised Learning

C) Artificial General Intelligence

D) Reinforcement Learning

Correct answer: A) Supervised Learning

WHY: Supervised Learning means learning from examples paired with target labels. Roman Urdu: Is definition ka central idea Supervised Learning hai.

MENTAL MODEL: A teacher supplies answer keys.

Q30. Which concept is BEST illustrated by this situation: training a model on emails marked spam or not spam?

A) AI in Healthcare

B) Supervised Learning

C) Natural Language Processing

D) Generative AI

Correct answer: B) Supervised Learning

WHY: This situation is an example of Supervised Learning. The key concept is: learning from examples paired with target labels. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A teacher supplies answer keys.

Q31. Which concept best matches this definition: finding structure in data without provided target labels?

A) Human-in-the-loop

B) Unsupervised Learning

C) Reinforcement Learning

D) Natural Language Processing

Correct answer: B) Unsupervised Learning

WHY: Unsupervised Learning means finding structure in data without provided target labels. Roman Urdu: Is definition ka central idea Unsupervised Learning hai.

MENTAL MODEL: Sort a box without answer labels.

Q32. Which concept is BEST illustrated by this situation: grouping customers by buying behavior?

A) Training Data

B) Robotics

C) Human-in-the-loop

D) Unsupervised Learning

Correct answer: D) Unsupervised Learning

WHY: This situation is an example of Unsupervised Learning. The key concept is: finding structure in data without provided target labels. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Sort a box without answer labels.

Q33. Which concept best matches this definition: learning actions through rewards and penalties?

A) AI Project Lifecycle

B) Reinforcement Learning

C) Alan Turing

D) AI in Banking

Correct answer: B) Reinforcement Learning

WHY: Reinforcement Learning means learning actions through rewards and penalties. Roman Urdu: Is definition ka central idea Reinforcement Learning hai.

MENTAL MODEL: Practice with scores as feedback.

Q34. Which concept is BEST illustrated by this situation: an agent learns a game from reward signals?

A) Robotics

B) Reinforcement Learning

C) AI in Healthcare

D) Dartmouth Workshop 1956

Correct answer: B) Reinforcement Learning

WHY: This situation is an example of Reinforcement Learning. The key concept is: learning actions through rewards and penalties. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Practice with scores as feedback.

Q35. Which concept best matches this definition: examples used to fit the parameters of a model?

A) Supervised Learning

B) Robotics

C) Human-in-the-loop

D) Training Data

Correct answer: D) Training Data

WHY: Training Data means examples used to fit the parameters of a model. Roman Urdu: Is definition ka central idea Training Data hai.

MENTAL MODEL: Training data is the textbook.

Q36. Which concept is BEST illustrated by this situation: historical sales records are supplied during model training?

A) Computer Vision

B) Algorithmic Bias

C) Training Data

D) Alan Turing

Correct answer: C) Training Data

WHY: This situation is an example of Training Data. The key concept is: examples used to fit the parameters of a model. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Training data is the textbook.

Q37. Which concept best matches this definition: using a trained model to produce an output for a new input?

A) Inference

B) Machine Learning

C) AI in Healthcare

D) AI in Banking

Correct answer: A) Inference

WHY: Inference means using a trained model to produce an output for a new input. Roman Urdu: Is definition ka central idea Inference hai.

MENTAL MODEL: Inference is taking the exam after studying.

Q38. Which concept is BEST illustrated by this situation: a deployed classifier labels a new email?

A) Deep Learning

B) Unsupervised Learning

C) Turing Test

D) Inference

Correct answer: D) Inference

WHY: This situation is an example of Inference. The key concept is: using a trained model to produce an output for a new input. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Inference is taking the exam after studying.

Q39. Which concept best matches this definition: a generated claim that is false or unsupported?

A) Artificial Intelligence

B) Reinforcement Learning

C) AI Hallucination

D) Computer Vision

Correct answer: C) AI Hallucination

WHY: AI Hallucination means a generated claim that is false or unsupported. Roman Urdu: Is definition ka central idea AI Hallucination hai.

MENTAL MODEL: Fluent wording does not guarantee truth.

Q40. Which concept is BEST illustrated by this situation: a chatbot invents a journal citation?

A) Narrow AI

B) Deep Learning

C) AI Hallucination

D) Computer Vision

Correct answer: C) AI Hallucination

WHY: This situation is an example of AI Hallucination. The key concept is: a generated claim that is false or unsupported. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Fluent wording does not guarantee truth.

Q41. Which concept best matches this definition: systematic unfairness caused by data or system design?

A) Algorithmic Bias

B) AI Hallucination

C) AI in Banking

D) Artificial General Intelligence

Correct answer: A) Algorithmic Bias

WHY: Algorithmic Bias means systematic unfairness caused by data or system design. Roman Urdu: Is definition ka central idea Algorithmic Bias hai.

MENTAL MODEL: A tilted ruler gives tilted measurements.

Q42. Which concept is BEST illustrated by this situation: a hiring model disadvantages a demographic group?

A) Natural Language Processing

B) Algorithmic Bias

C) Turing Test

D) AI in Banking

Correct answer: B) Algorithmic Bias

WHY: This situation is an example of Algorithmic Bias. The key concept is: systematic unfairness caused by data or system design. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A tilted ruler gives tilted measurements.

Q43. Which concept best matches this definition: a process where humans supervise or review automated decisions?

A) Human-in-the-loop

B) Machine Learning

C) Turing Test

D) Expert System

Correct answer: A) Human-in-the-loop

WHY: Human-in-the-loop means a process where humans supervise or review automated decisions. Roman Urdu: Is definition ka central idea Human-in-the-loop hai.

MENTAL MODEL: AI suggests while humans check.

Q44. Which concept is BEST illustrated by this situation: a doctor reviews an AI-generated risk flag?

A) Human-in-the-loop

B) Turing Test

C) John McCarthy

D) Deep Learning

Correct answer: A) Human-in-the-loop

WHY: This situation is an example of Human-in-the-loop. The key concept is: a process where humans supervise or review automated decisions. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: AI suggests while humans check.

Q45. Which concept best matches this definition: using AI to assist medical processes under appropriate oversight?

A) AI Hallucination

B) Artificial General Intelligence

C) AI in Healthcare

D) Artificial Intelligence

Correct answer: C) AI in Healthcare

WHY: AI in Healthcare means using AI to assist medical processes under appropriate oversight. Roman Urdu: Is definition ka central idea AI in Healthcare hai.

MENTAL MODEL: AI is a clinical assistant not the doctor.

Q46. Which concept is BEST illustrated by this situation: a hospital prioritizes appointments using risk signals?

A) Turing Test

B) AI in Banking

C) AI in Healthcare

D) Reinforcement Learning

Correct answer: C) AI in Healthcare

WHY: This situation is an example of AI in Healthcare. The key concept is: using AI to assist medical processes under appropriate oversight. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: AI is a clinical assistant not the doctor.

Q47. Which concept best matches this definition: using AI for financial processes such as fraud monitoring?

A) AI in Banking

B) Unsupervised Learning

C) Robotics

D) AI in Healthcare

Correct answer: A) AI in Banking

WHY: AI in Banking means using AI for financial processes such as fraud monitoring. Roman Urdu: Is definition ka central idea AI in Banking hai.

MENTAL MODEL: A watchman spots unusual patterns.

Q48. Which concept is BEST illustrated by this situation: a bank flags suspicious transactions for review?

A) Inference

B) Supervised Learning

C) Dartmouth Workshop 1956

D) AI in Banking

Correct answer: D) AI in Banking

WHY: This situation is an example of AI in Banking. The key concept is: using AI for financial processes such as fraud monitoring. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A watchman spots unusual patterns.

Q49. Which concept best matches this definition: stages from problem definition through data, development, deployment and monitoring?

A) Human-in-the-loop

B) Robotics

C) AI Project Lifecycle

D) Narrow AI

Correct answer: C) AI Project Lifecycle

WHY: AI Project Lifecycle means stages from problem definition through data, development, deployment and monitoring. Roman Urdu: Is definition ka central idea AI Project Lifecycle hai.

MENTAL MODEL: Build AI like a product with checkpoints.

Q50. Which concept is BEST illustrated by this situation: a team defines a support problem then tests and monitors a chatbot?

A) AI in Healthcare

B) Artificial General Intelligence

C) Alan Turing

D) AI Project Lifecycle

Correct answer: D) AI Project Lifecycle

WHY: This situation is an example of AI Project Lifecycle. The key concept is: stages from problem definition through data, development, deployment and monitoring. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Build AI like a product with checkpoints.

Week 2

Q51. Which concept best matches this definition: a conversational AI assistant for drafting, explanation and problem solving?

A) API Key

B) Gemini

C) Microsoft Copilot

D) ChatGPT

Correct answer: D) ChatGPT

WHY: ChatGPT means a conversational AI assistant for drafting, explanation and problem solving. Roman Urdu: Is definition ka central idea ChatGPT hai.

MENTAL MODEL: A flexible conversational workbench.

Q52. Which concept is BEST illustrated by this situation: a student requests a study outline and checks the facts?

A) Cost-Benefit Analysis

B) ChatGPT

C) Automation

D) Microsoft Copilot

Correct answer: B) ChatGPT

WHY: This situation is an example of ChatGPT. The key concept is: a conversational AI assistant for drafting, explanation and problem solving. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A flexible conversational workbench.

Q53. Which concept best matches this definition: google AI assistant used for multimodal and productivity tasks?

A) Gemini

B) Human Escalation

C) ChatGPT

D) System Integration

Correct answer: A) Gemini

WHY: Gemini means google AI assistant used for multimodal and productivity tasks. Roman Urdu: Is definition ka central idea Gemini hai.

MENTAL MODEL: One assistant for different information types.

Q54. Which concept is BEST illustrated by this situation: a learner discusses an image and related text?

A) Access Control

B) Claude

C) Gemini

D) Data Privacy

Correct answer: C) Gemini

WHY: This situation is an example of Gemini. The key concept is: google AI assistant used for multimodal and productivity tasks. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: One assistant for different information types.

Q55. Which concept best matches this definition: microsoft-branded AI assistance integrated into productivity and development contexts?

A) API Key

B) Microsoft Copilot

C) ChatGPT

D) Human Escalation

Correct answer: B) Microsoft Copilot

WHY: Microsoft Copilot means microsoft-branded AI assistance integrated into productivity and development contexts. Roman Urdu: Is definition ka central idea Microsoft Copilot hai.

MENTAL MODEL: An assistant alongside everyday work.

Q56. Which concept is BEST illustrated by this situation: a worker drafts a document with Copilot?

A) Workflow Mapping

B) Data Privacy

C) Automation

D) Microsoft Copilot

Correct answer: D) Microsoft Copilot

WHY: This situation is an example of Microsoft Copilot. The key concept is: microsoft-branded AI assistance integrated into productivity and development contexts. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: An assistant alongside everyday work.

Q57. Which concept best matches this definition: an AI assistant used for writing, analysis and coding?

A) Claude

B) Cloud AI

C) Tool Benchmarking

D) Human Escalation

Correct answer: A) Claude

WHY: Claude means an AI assistant used for writing, analysis and coding. Roman Urdu: Is definition ka central idea Claude hai.

MENTAL MODEL: A reasoning and writing partner.

Q58. Which concept is BEST illustrated by this situation: a developer asks Claude to explain a codebase?

A) AI Assistant

B) Claude

C) API Key

D) Latency

Correct answer: B) Claude

WHY: This situation is an example of Claude. The key concept is: an AI assistant used for writing, analysis and coding. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A reasoning and writing partner.

Q59. Which concept best matches this definition: an AI-oriented search and answer service that surfaces sources?

A) Accuracy

B) Perplexity

C) Workflow Mapping

D) ChatGPT

Correct answer: B) Perplexity

WHY: Perplexity means an AI-oriented search and answer service that surfaces sources. Roman Urdu: Is definition ka central idea Perplexity hai.

MENTAL MODEL: A research guide pointing to sources.

Q60. Which concept is BEST illustrated by this situation: a researcher requests a sourced overview of a topic?

A) AI Governance

B) Perplexity

C) Latency

D) Microsoft Copilot

Correct answer: B) Perplexity

WHY: This situation is an example of Perplexity. The key concept is: an AI-oriented search and answer service that surfaces sources. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A research guide pointing to sources.

Q61. Which concept best matches this definition: aI computing and services delivered through remote infrastructure?

A) Cloud AI

B) Microsoft Copilot

C) Sustainable AI Implementation

D) Tool Benchmarking

Correct answer: A) Cloud AI

WHY: Cloud AI means aI computing and services delivered through remote infrastructure. Roman Urdu: Is definition ka central idea Cloud AI hai.

MENTAL MODEL: Rent computing rather than buy the building.

Q62. Which concept is BEST illustrated by this situation: a company accesses a hosted model without owning GPUs?

A) AI Governance

B) Cloud AI

C) User Adoption

D) Return on Investment

Correct answer: B) Cloud AI

WHY: This situation is an example of Cloud AI. The key concept is: aI computing and services delivered through remote infrastructure. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Rent computing rather than buy the building.

Q63. Which concept best matches this definition: software that helps users complete tasks using AI capabilities?

A) API Key

B) Latency

C) AI Assistant

D) Access Control

Correct answer: C) AI Assistant

WHY: AI Assistant means software that helps users complete tasks using AI capabilities. Roman Urdu: Is definition ka central idea AI Assistant hai.

MENTAL MODEL: A digital helper for tasks.

Q64. Which concept is BEST illustrated by this situation: an assistant summarizes a meeting transcript?

A) Tool Benchmarking

B) AI Assistant

C) Sustainable AI Implementation

D) Access Control

Correct answer: B) AI Assistant

WHY: This situation is an example of AI Assistant. The key concept is: software that helps users complete tasks using AI capabilities. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A digital helper for tasks.

Q65. Which concept best matches this definition: a programming interface through which software accesses AI capabilities?

A) Latency

B) Tool Benchmarking

C) ChatGPT

D) AI API

Correct answer: D) AI API

WHY: AI API means a programming interface through which software accesses AI capabilities. Roman Urdu: Is definition ka central idea AI API hai.

MENTAL MODEL: API is a service counter between apps.

Q66. Which concept is BEST illustrated by this situation: an app sends a request to a hosted language model?

A) Access Control

B) Workflow Mapping

C) AI API

D) User Adoption

Correct answer: C) AI API

WHY: This situation is an example of AI API. The key concept is: a programming interface through which software accesses AI capabilities. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: API is a service counter between apps.

Q67. Which concept best matches this definition: a credential used to authenticate access to an API?

A) Latency

B) API Key

C) Human Escalation

D) Return on Investment

Correct answer: B) API Key

WHY: API Key means a credential used to authenticate access to an API. Roman Urdu: Is definition ka central idea API Key hai.

MENTAL MODEL: A private key to the service door.

Q68. Which concept is BEST illustrated by this situation: a developer stores a secret token outside source control?

A) Automation

B) System Integration

C) AI API

D) API Key

Correct answer: D) API Key

WHY: This situation is an example of API Key. The key concept is: a credential used to authenticate access to an API. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A private key to the service door.

Q69. Which concept best matches this definition: connecting AI capabilities with existing business software?

A) Accuracy

B) User Adoption

C) System Integration

D) Perplexity

Correct answer: C) System Integration

WHY: System Integration means connecting AI capabilities with existing business software. Roman Urdu: Is definition ka central idea System Integration hai.

MENTAL MODEL: Connect the pieces of one workflow.

Q70. Which concept is BEST illustrated by this situation: a CRM sends support requests to an AI service?

A) Perplexity

B) Data Privacy

C) System Integration

D) Cloud AI

Correct answer: C) System Integration

WHY: This situation is an example of System Integration. The key concept is: connecting AI capabilities with existing business software. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Connect the pieces of one workflow.

Q71. Which concept best matches this definition: representing the steps and decisions in a process?

A) Tool Benchmarking

B) Sustainable AI Implementation

C) Return on Investment

D) Workflow Mapping

Correct answer: D) Workflow Mapping

WHY: Workflow Mapping means representing the steps and decisions in a process. Roman Urdu: Is definition ka central idea Workflow Mapping hai.

MENTAL MODEL: A route map for work.

Q72. Which concept is BEST illustrated by this situation: a team draws intake, routing and resolution steps?

A) Accuracy

B) Gemini

C) Workflow Mapping

D) AI Assistant

Correct answer: C) Workflow Mapping

WHY: This situation is an example of Workflow Mapping. The key concept is: representing the steps and decisions in a process. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A route map for work.

Q73. Which concept best matches this definition: using software to perform repetitive steps with limited manual intervention?

A) User Adoption

B) Risk Assessment

C) Cloud AI

D) Automation

Correct answer: D) Automation

WHY: Automation means using software to perform repetitive steps with limited manual intervention. Roman Urdu: Is definition ka central idea Automation hai.

MENTAL MODEL: A conveyor belt for repeated tasks.

Q74. Which concept is BEST illustrated by this situation: a ticket is categorized automatically when submitted?

A) Workflow Mapping

B) Automation

C) Microsoft Copilot

D) Accuracy

Correct answer: B) Automation

WHY: This situation is an example of Automation. The key concept is: using software to perform repetitive steps with limited manual intervention. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A conveyor belt for repeated tasks.

Q75. Which concept best matches this definition: transferring difficult or sensitive AI-handled cases to staff?

A) Human Escalation

B) AI Assistant

C) Scalability

D) Cloud AI

Correct answer: A) Human Escalation

WHY: Human Escalation means transferring difficult or sensitive AI-handled cases to staff. Roman Urdu: Is definition ka central idea Human Escalation hai.

MENTAL MODEL: A safety exit to a human.

Q76. Which concept is BEST illustrated by this situation: an angry customer is transferred to a support agent?

A) Return on Investment

B) Workflow Mapping

C) ChatGPT

D) Human Escalation

Correct answer: D) Human Escalation

WHY: This situation is an example of Human Escalation. The key concept is: transferring difficult or sensitive AI-handled cases to staff. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A safety exit to a human.

Q77. Which concept best matches this definition: comparing tools against consistent tasks and metrics?

A) Sustainable AI Implementation

B) ChatGPT

C) Data Privacy

D) Tool Benchmarking

Correct answer: D) Tool Benchmarking

WHY: Tool Benchmarking means comparing tools against consistent tasks and metrics. Roman Urdu: Is definition ka central idea Tool Benchmarking hai.

MENTAL MODEL: A fair race uses the same track.

Q78. Which concept is BEST illustrated by this situation: two assistants answer the same factual prompts and are scored?

A) Latency

B) Automation

C) Tool Benchmarking

D) Sustainable AI Implementation

Correct answer: C) Tool Benchmarking

WHY: This situation is an example of Tool Benchmarking. The key concept is: comparing tools against consistent tasks and metrics. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A fair race uses the same track.

Q79. Which concept best matches this definition: how often a system's outputs are correct under a defined evaluation?

A) AI Assistant

B) Human Escalation

C) ChatGPT

D) Accuracy

Correct answer: D) Accuracy

WHY: Accuracy means how often a system's outputs are correct under a defined evaluation. Roman Urdu: Is definition ka central idea Accuracy hai.

MENTAL MODEL: Accuracy asks how many answers are right.

Q80. Which concept is BEST illustrated by this situation: a test checks the proportion of correctly answered questions?

A) AI API

B) Accuracy

C) API Key

D) Claude

Correct answer: B) Accuracy

WHY: This situation is an example of Accuracy. The key concept is: how often a system's outputs are correct under a defined evaluation. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Accuracy asks how many answers are right.

Q81. Which concept best matches this definition: elapsed time between a request and its response?

A) Access Control

B) Microsoft Copilot

C) System Integration

D) Latency

Correct answer: D) Latency

WHY: Latency means elapsed time between a request and its response. Roman Urdu: Is definition ka central idea Latency hai.

MENTAL MODEL: Latency is waiting time.

Q82. Which concept is BEST illustrated by this situation: a chatbot responds in two seconds?

A) System Integration

B) Sustainable AI Implementation

C) Gemini

D) Latency

Correct answer: D) Latency

WHY: This situation is an example of Latency. The key concept is: elapsed time between a request and its response. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Latency is waiting time.

Q83. Which concept best matches this definition: ability to handle increased demand while maintaining acceptable service?

A) Sustainable AI Implementation

B) Gemini

C) Scalability

D) Access Control

Correct answer: C) Scalability

WHY: Scalability means ability to handle increased demand while maintaining acceptable service. Roman Urdu: Is definition ka central idea Scalability hai.

MENTAL MODEL: A shop that can serve a bigger queue.

Q84. Which concept is BEST illustrated by this situation: a support bot handles more concurrent users?

A) Cloud AI

B) Scalability

C) User Adoption

D) Tool Benchmarking

Correct answer: B) Scalability

WHY: This situation is an example of Scalability. The key concept is: ability to handle increased demand while maintaining acceptable service. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A shop that can serve a bigger queue.

Q85. Which concept best matches this definition: comparison of expected gains with implementation and operating costs?

A) ChatGPT

B) Microsoft Copilot

C) Cost-Benefit Analysis

D) Risk Assessment

Correct answer: C) Cost-Benefit Analysis

WHY: Cost-Benefit Analysis means comparison of expected gains with implementation and operating costs. Roman Urdu: Is definition ka central idea Cost-Benefit Analysis hai.

MENTAL MODEL: Compare what goes out with what comes back.

Q86. Which concept is BEST illustrated by this situation: a manager weighs subscription cost against saved staff hours?

A) Perplexity

B) Cost-Benefit Analysis

C) Sustainable AI Implementation

D) Latency

Correct answer: B) Cost-Benefit Analysis

WHY: This situation is an example of Cost-Benefit Analysis. The key concept is: comparison of expected gains with implementation and operating costs. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Compare what goes out with what comes back.

Q87. Which concept best matches this definition: net benefit relative to investment cost?

A) Automation

B) Perplexity

C) ChatGPT

D) Return on Investment

Correct answer: D) Return on Investment

WHY: Return on Investment means net benefit relative to investment cost. Roman Urdu: Is definition ka central idea Return on Investment hai.

MENTAL MODEL: ROI measures return per invested rupee.

Q88. Which concept is BEST illustrated by this situation: a business estimates savings versus deployment expense?

A) ChatGPT

B) AI Governance

C) Return on Investment

D) Gemini

Correct answer: C) Return on Investment

WHY: This situation is an example of Return on Investment. The key concept is: net benefit relative to investment cost. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: ROI measures return per invested rupee.

Q89. Which concept best matches this definition: policies and oversight for responsible development and use of AI?

A) Tool Benchmarking

B) AI Governance

C) Microsoft Copilot

D) System Integration

Correct answer: B) AI Governance

WHY: AI Governance means policies and oversight for responsible development and use of AI. Roman Urdu: Is definition ka central idea AI Governance hai.

MENTAL MODEL: Traffic rules for AI use.

Q90. Which concept is BEST illustrated by this situation: a company sets approval and auditing rules?

A) Accuracy

B) Tool Benchmarking

C) Risk Assessment

D) AI Governance

Correct answer: D) AI Governance

WHY: This situation is an example of AI Governance. The key concept is: policies and oversight for responsible development and use of AI. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Traffic rules for AI use.

Q91. Which concept best matches this definition: protecting personal data from inappropriate access and use?

A) Tool Benchmarking

B) Cloud AI

C) ChatGPT

D) Data Privacy

Correct answer: D) Data Privacy

WHY: Data Privacy means protecting personal data from inappropriate access and use. Roman Urdu: Is definition ka central idea Data Privacy hai.

MENTAL MODEL: Keep private records behind a lock.

Q92. Which concept is BEST illustrated by this situation: a service masks student identifiers before analysis?

A) Data Privacy

B) AI Assistant

C) AI Governance

D) Cloud AI

Correct answer: A) Data Privacy

WHY: This situation is an example of Data Privacy. The key concept is: protecting personal data from inappropriate access and use. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Keep private records behind a lock.

Q93. Which concept best matches this definition: restricting system functions and data to authorized users?

A) Data Privacy

B) Access Control

C) Cloud AI

D) Sustainable AI Implementation

Correct answer: B) Access Control

WHY: Access Control means restricting system functions and data to authorized users. Roman Urdu: Is definition ka central idea Access Control hai.

MENTAL MODEL: Different keys open different doors.

Q94. Which concept is BEST illustrated by this situation: only managers can see confidential AI reports?

A) System Integration

B) Human Escalation

C) Workflow Mapping

D) Access Control

Correct answer: D) Access Control

WHY: This situation is an example of Access Control. The key concept is: restricting system functions and data to authorized users. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Different keys open different doors.

Q95. Which concept best matches this definition: the extent to which intended users actually begin using a system?

A) Workflow Mapping

B) Scalability

C) User Adoption

D) Latency

Correct answer: C) User Adoption

WHY: User Adoption means the extent to which intended users actually begin using a system. Roman Urdu: Is definition ka central idea User Adoption hai.

MENTAL MODEL: A tool helps only if people use it.

Q96. Which concept is BEST illustrated by this situation: staff attend training and use a new assistant regularly?

A) Scalability

B) API Key

C) User Adoption

D) Cloud AI

Correct answer: C) User Adoption

WHY: This situation is an example of User Adoption. The key concept is: the extent to which intended users actually begin using a system. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A tool helps only if people use it.

Q97. Which concept best matches this definition: identifying and evaluating possible harms or failures?

A) AI Governance

B) Cost-Benefit Analysis

C) Risk Assessment

D) AI Assistant

Correct answer: C) Risk Assessment

WHY: Risk Assessment means identifying and evaluating possible harms or failures. Roman Urdu: Is definition ka central idea Risk Assessment hai.

MENTAL MODEL: Check the hazards before driving.

Q98. Which concept is BEST illustrated by this situation: a team lists privacy and inaccurate-answer risks?

A) Workflow Mapping

B) Risk Assessment

C) Return on Investment

D) Claude

Correct answer: B) Risk Assessment

WHY: This situation is an example of Risk Assessment. The key concept is: identifying and evaluating possible harms or failures. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Check the hazards before driving.

Q99. Which concept best matches this definition: maintaining useful AI systems responsibly over time?

A) Data Privacy

B) Gemini

C) AI Assistant

D) Sustainable AI Implementation

Correct answer: D) Sustainable AI Implementation

WHY: Sustainable AI Implementation means maintaining useful AI systems responsibly over time. Roman Urdu: Is definition ka central idea Sustainable AI Implementation hai.

MENTAL MODEL: Keep the engine efficient for the long run.

Q100. Which concept is BEST illustrated by this situation: a team monitors costs, performance and energy use?

A) Sustainable AI Implementation

B) Workflow Mapping

C) Scalability

D) Cloud AI

Correct answer: A) Sustainable AI Implementation

WHY: This situation is an example of Sustainable AI Implementation. The key concept is: maintaining useful AI systems responsibly over time. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Keep the engine efficient for the long run.

Week 3

Q101. Which concept best matches this definition: an input instruction or request provided to an AI model?

A) System Instruction

B) Task Decomposition

C) Prompt

D) Prompt Debugging

Correct answer: C) Prompt

WHY: Prompt means an input instruction or request provided to an AI model. Roman Urdu: Is definition ka central idea Prompt hai.

MENTAL MODEL: A prompt is the task brief.

Q102. Which concept is BEST illustrated by this situation: a user asks for a five-line summary?

A) Prompt Template

B) Prompt Engineering

C) Prompt

D) Hallucination Reduction

Correct answer: C) Prompt

WHY: This situation is an example of Prompt. The key concept is: an input instruction or request provided to an AI model. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A prompt is the task brief.

Q103. Which concept best matches this definition: designing and improving instructions to obtain useful AI outputs?

A) Prompt Engineering

B) Output Validation

C) Prompt Injection

D) Fact Checking

Correct answer: A) Prompt Engineering

WHY: Prompt Engineering means designing and improving instructions to obtain useful AI outputs. Roman Urdu: Is definition ka central idea Prompt Engineering hai.

MENTAL MODEL: Better directions produce better routes.

Q104. Which concept is BEST illustrated by this situation: a writer revises a vague request into a structured brief?

A) Chain Prompting

B) Prompt Engineering

C) Role Prompting

D) Expert Prompting

Correct answer: B) Prompt Engineering

WHY: This situation is an example of Prompt Engineering. The key concept is: designing and improving instructions to obtain useful AI outputs. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Better directions produce better routes.

Q105. Which concept best matches this definition: providing relevant information and constraints around an AI task?

A) Prompt Template

B) Specificity

C) AI Assistant Evaluation

D) Context Engineering

Correct answer: D) Context Engineering

WHY: Context Engineering means providing relevant information and constraints around an AI task. Roman Urdu: Is definition ka central idea Context Engineering hai.

MENTAL MODEL: Context is the reference folder on the desk.

Q106. Which concept is BEST illustrated by this situation: a model receives policy excerpts before answering?

A) Output Format Constraint

B) Ethical Prompting

C) System Instruction

D) Context Engineering

Correct answer: D) Context Engineering

WHY: This situation is an example of Context Engineering. The key concept is: providing relevant information and constraints around an AI task. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Context is the reference folder on the desk.

Q107. Which concept best matches this definition: a high-priority instruction defining assistant behavior?

A) System Instruction

B) Task Decomposition

C) Output Format Constraint

D) Prompt Debugging

Correct answer: A) System Instruction

WHY: System Instruction means a high-priority instruction defining assistant behavior. Roman Urdu: Is definition ka central idea System Instruction hai.

MENTAL MODEL: Set the ground rules before the task.

Q108. Which concept is BEST illustrated by this situation: an assistant is instructed to answer as a study tutor?

A) Output Format Constraint

B) Persona Design

C) Prompt

D) System Instruction

Correct answer: D) System Instruction

WHY: This situation is an example of System Instruction. The key concept is: a high-priority instruction defining assistant behavior. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Set the ground rules before the task.

Q109. Which concept best matches this definition: a requirement defining the structure of a response?

A) Chain Prompting

B) Prompt Iteration

C) Output Format Constraint

D) Expert Prompting

Correct answer: C) Output Format Constraint

WHY: Output Format Constraint means a requirement defining the structure of a response. Roman Urdu: Is definition ka central idea Output Format Constraint hai.

MENTAL MODEL: Choose the shape of the answer.

Q110. Which concept is BEST illustrated by this situation: a prompt requests a table with three columns?

A) Ethical Prompting

B) Few-Shot Prompting

C) Output Format Constraint

D) Multi-Agent Workflow

Correct answer: C) Output Format Constraint

WHY: This situation is an example of Output Format Constraint. The key concept is: a requirement defining the structure of a response. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Choose the shape of the answer.

Q111. Which concept best matches this definition: requesting a task without supplying worked examples?

A) Multi-Agent Workflow

B) Zero-Shot Prompting

C) Prompt Debugging

D) System Instruction

Correct answer: B) Zero-Shot Prompting

WHY: Zero-Shot Prompting means requesting a task without supplying worked examples. Roman Urdu: Is definition ka central idea Zero-Shot Prompting hai.

MENTAL MODEL: Ask directly with no sample.

Q112. Which concept is BEST illustrated by this situation: classify this review as positive or negative?

A) Prompt Debugging

B) Fact Checking

C) Zero-Shot Prompting

D) Prompt Engineering

Correct answer: C) Zero-Shot Prompting

WHY: This situation is an example of Zero-Shot Prompting. The key concept is: requesting a task without supplying worked examples. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Ask directly with no sample.

Q113. Which concept best matches this definition: providing one example before the task?

A) One-Shot Prompting

B) Prompt Template

C) Multi-Agent Workflow

D) Prompt Engineering

Correct answer: A) One-Shot Prompting

WHY: One-Shot Prompting means providing one example before the task. Roman Urdu: Is definition ka central idea One-Shot Prompting hai.

MENTAL MODEL: Show one solved example.

Q114. Which concept is BEST illustrated by this situation: one labeled review is shown before classifying another?

A) Hallucination Reduction

B) One-Shot Prompting

C) Prompt Debugging

D) Task Decomposition

Correct answer: B) One-Shot Prompting

WHY: This situation is an example of One-Shot Prompting. The key concept is: providing one example before the task. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Show one solved example.

Q115. Which concept best matches this definition: providing several examples to guide task behavior?

A) Few-Shot Prompting

B) Prompt Engineering

C) Multi-Agent Workflow

D) Reusable Prompt Library

Correct answer: A) Few-Shot Prompting

WHY: Few-Shot Prompting means providing several examples to guide task behavior. Roman Urdu: Is definition ka central idea Few-Shot Prompting hai.

MENTAL MODEL: Teach by several demonstrations.

Q116. Which concept is BEST illustrated by this situation: three labeled reviews precede a new review?

A) Ethical Prompting

B) Few-Shot Prompting

C) Reusable Prompt Library

D) Multi-Agent Workflow

Correct answer: B) Few-Shot Prompting

WHY: This situation is an example of Few-Shot Prompting. The key concept is: providing several examples to guide task behavior. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Teach by several demonstrations.

Q117. Which concept best matches this definition: breaking a complex task into linked prompt stages?

A) Role Prompting

B) Zero-Shot Prompting

C) Chain Prompting

D) Hallucination Reduction

Correct answer: C) Chain Prompting

WHY: Chain Prompting means breaking a complex task into linked prompt stages. Roman Urdu: Is definition ka central idea Chain Prompting hai.

MENTAL MODEL: Use stepping stones instead of one leap.

Q118. Which concept is BEST illustrated by this situation: first outline a report then draft then verify?

A) Prompt Debugging

B) AI Assistant Evaluation

C) Persona Design

D) Chain Prompting

Correct answer: D) Chain Prompting

WHY: This situation is an example of Chain Prompting. The key concept is: breaking a complex task into linked prompt stages. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Use stepping stones instead of one leap.

Q119. Which concept best matches this definition: a reusable instruction pattern with variable placeholders?

A) Prompt Template

B) Prompt Engineering

C) Prompt Debugging

D) Chain Prompting

Correct answer: A) Prompt Template

WHY: Prompt Template means a reusable instruction pattern with variable placeholders. Roman Urdu: Is definition ka central idea Prompt Template hai.

MENTAL MODEL: A reusable form with blanks.

Q120. Which concept is BEST illustrated by this situation: a support prompt inserts customer name and issue?

A) Prompt Injection

B) Few-Shot Prompting

C) Prompt Debugging

D) Prompt Template

Correct answer: D) Prompt Template

WHY: This situation is an example of Prompt Template. The key concept is: a reusable instruction pattern with variable placeholders. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A reusable form with blanks.

Q121. Which concept best matches this definition: assigning a role to guide tone and approach?

A) Chain Prompting

B) Ethical Prompting

C) Reusable Prompt Library

D) Role Prompting

Correct answer: D) Role Prompting

WHY: Role Prompting means assigning a role to guide tone and approach. Roman Urdu: Is definition ka central idea Role Prompting hai.

MENTAL MODEL: Give the assistant a job title.

Q122. Which concept is BEST illustrated by this situation: act as a patient mathematics tutor?

A) Output Format Constraint

B) Few-Shot Prompting

C) Role Prompting

D) Prompt Debugging

Correct answer: C) Role Prompting

WHY: This situation is an example of Role Prompting. The key concept is: assigning a role to guide tone and approach. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Give the assistant a job title.

Q123. Which concept best matches this definition: requesting analysis from a specified professional perspective?

A) Prompt Template

B) Expert Prompting

C) System Instruction

D) One-Shot Prompting

Correct answer: B) Expert Prompting

WHY: Expert Prompting means requesting analysis from a specified professional perspective. Roman Urdu: Is definition ka central idea Expert Prompting hai.

MENTAL MODEL: Choose a specialist lens.

Q124. Which concept is BEST illustrated by this situation: review this plan as a cybersecurity analyst?

A) Expert Prompting

B) Output Validation

C) Prompt Iteration

D) Context Engineering

Correct answer: A) Expert Prompting

WHY: This situation is an example of Expert Prompting. The key concept is: requesting analysis from a specified professional perspective. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Choose a specialist lens.

Q125. Which concept best matches this definition: defining an intended voice, audience and interaction style?

A) System Instruction

B) One-Shot Prompting

C) Persona Design

D) Multi-Agent Workflow

Correct answer: C) Persona Design

WHY: Persona Design means defining an intended voice, audience and interaction style. Roman Urdu: Is definition ka central idea Persona Design hai.

MENTAL MODEL: A character sheet for communication.

Q126. Which concept is BEST illustrated by this situation: an assistant is configured for first-year students?

A) Output Format Constraint

B) Persona Design

C) Output Validation

D) Prompt Iteration

Correct answer: B) Persona Design

WHY: This situation is an example of Persona Design. The key concept is: defining an intended voice, audience and interaction style. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A character sheet for communication.

Q127. Which concept best matches this definition: clarity and precision about the requested task?

A) Expert Prompting

B) One-Shot Prompting

C) Prompt Template

D) Specificity

Correct answer: D) Specificity

WHY: Specificity means clarity and precision about the requested task. Roman Urdu: Is definition ka central idea Specificity hai.

MENTAL MODEL: Precise instructions reduce guesswork.

Q128. Which concept is BEST illustrated by this situation: explain three risks in 100 words with examples?

A) Prompt Debugging

B) Specificity

C) Prompt Engineering

D) Fact Checking

Correct answer: B) Specificity

WHY: This situation is an example of Specificity. The key concept is: clarity and precision about the requested task. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Precise instructions reduce guesswork.

Q129. Which concept best matches this definition: splitting a large task into smaller manageable subtasks?

A) Prompt Iteration

B) Prompt Engineering

C) Specificity

D) Task Decomposition

Correct answer: D) Task Decomposition

WHY: Task Decomposition means splitting a large task into smaller manageable subtasks. Roman Urdu: Is definition ka central idea Task Decomposition hai.

MENTAL MODEL: Cut a big problem into slices.

Q130. Which concept is BEST illustrated by this situation: research, outline, draft and edit a proposal separately?

A) Task Decomposition

B) Chain Prompting

C) Prompt Iteration

D) System Instruction

Correct answer: A) Task Decomposition

WHY: This situation is an example of Task Decomposition. The key concept is: splitting a large task into smaller manageable subtasks. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Cut a big problem into slices.

Q131. Which concept best matches this definition: repeatedly refining prompts based on observed outputs?

A) Prompt Debugging

B) AI Assistant Evaluation

C) Prompt Iteration

D) Zero-Shot Prompting

Correct answer: C) Prompt Iteration

WHY: Prompt Iteration means repeatedly refining prompts based on observed outputs. Roman Urdu: Is definition ka central idea Prompt Iteration hai.

MENTAL MODEL: Draft, test, improve, repeat.

Q132. Which concept is BEST illustrated by this situation: a user revises instructions after a weak summary?

A) Specificity

B) Hallucination Reduction

C) Prompt Iteration

D) Prompt Debugging

Correct answer: C) Prompt Iteration

WHY: This situation is an example of Prompt Iteration. The key concept is: repeatedly refining prompts based on observed outputs. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Draft, test, improve, repeat.

Q133. Which concept best matches this definition: diagnosing why a prompt produces poor or inconsistent responses?

A) Prompt Debugging

B) Output Validation

C) Output Format Constraint

D) Ethical Prompting

Correct answer: A) Prompt Debugging

WHY: Prompt Debugging means diagnosing why a prompt produces poor or inconsistent responses. Roman Urdu: Is definition ka central idea Prompt Debugging hai.

MENTAL MODEL: Find the faulty instruction like a software bug.

Q134. Which concept is BEST illustrated by this situation: a tester finds an ambiguous instruction and rewrites it?

A) Expert Prompting

B) Reusable Prompt Library

C) System Instruction

D) Prompt Debugging

Correct answer: D) Prompt Debugging

WHY: This situation is an example of Prompt Debugging. The key concept is: diagnosing why a prompt produces poor or inconsistent responses. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Find the faulty instruction like a software bug.

Q135. Which concept best matches this definition: verifying claims against reliable independent evidence?

A) Role Prompting

B) Output Format Constraint

C) Fact Checking

D) Output Validation

Correct answer: C) Fact Checking

WHY: Fact Checking means verifying claims against reliable independent evidence. Roman Urdu: Is definition ka central idea Fact Checking hai.

MENTAL MODEL: Trust but verify the receipt.

Q136. Which concept is BEST illustrated by this situation: a student checks an AI-cited statistic in its source?

A) Few-Shot Prompting

B) Prompt

C) Prompt Template

D) Fact Checking

Correct answer: D) Fact Checking

WHY: This situation is an example of Fact Checking. The key concept is: verifying claims against reliable independent evidence. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Trust but verify the receipt.

Q137. Which concept best matches this definition: checking responses against rules, schemas or requirements?

A) Prompt Debugging

B) Task Decomposition

C) Output Validation

D) Prompt Iteration

Correct answer: C) Output Validation

WHY: Output Validation means checking responses against rules, schemas or requirements. Roman Urdu: Is definition ka central idea Output Validation hai.

MENTAL MODEL: A quality gate before use.

Q138. Which concept is BEST illustrated by this situation: a program checks that returned JSON has required keys?

A) Chain Prompting

B) Prompt Template

C) Output Validation

D) Few-Shot Prompting

Correct answer: C) Output Validation

WHY: This situation is an example of Output Validation. The key concept is: checking responses against rules, schemas or requirements. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A quality gate before use.

Q139. Which concept best matches this definition: techniques intended to lower unsupported model claims?

A) Output Validation

B) Hallucination Reduction

C) Task Decomposition

D) Specificity

Correct answer: B) Hallucination Reduction

WHY: Hallucination Reduction means techniques intended to lower unsupported model claims. Roman Urdu: Is definition ka central idea Hallucination Reduction hai.

MENTAL MODEL: Ground answers before trusting them.

Q140. Which concept is BEST illustrated by this situation: an assistant is asked to cite provided evidence and admit uncertainty?

A) Output Format Constraint

B) AI Assistant Evaluation

C) Hallucination Reduction

D) Prompt

Correct answer: C) Hallucination Reduction

WHY: This situation is an example of Hallucination Reduction. The key concept is: techniques intended to lower unsupported model claims. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Ground answers before trusting them.

Q141. Which concept best matches this definition: writing requests that respect safety, fairness and privacy?

A) Ethical Prompting

B) Prompt Engineering

C) One-Shot Prompting

D) Prompt Template

Correct answer: A) Ethical Prompting

WHY: Ethical Prompting means writing requests that respect safety, fairness and privacy. Roman Urdu: Is definition ka central idea Ethical Prompting hai.

MENTAL MODEL: Ask responsibly, not just effectively.

Q142. Which concept is BEST illustrated by this situation: a student removes private records from a public prompt?

A) Ethical Prompting

B) Fact Checking

C) Specificity

D) Chain Prompting

Correct answer: A) Ethical Prompting

WHY: This situation is an example of Ethical Prompting. The key concept is: writing requests that respect safety, fairness and privacy. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Ask responsibly, not just effectively.

Q143. Which concept best matches this definition: malicious instructions embedded in untrusted content to redirect an AI system?

A) Fact Checking

B) Prompt Injection

C) System Instruction

D) Few-Shot Prompting

Correct answer: B) Prompt Injection

WHY: Prompt Injection means malicious instructions embedded in untrusted content to redirect an AI system. Roman Urdu: Is definition ka central idea Prompt Injection hai.

MENTAL MODEL: A forged note hidden inside the source.

Q144. Which concept is BEST illustrated by this situation: a webpage tells a summarizer to ignore its original task?

A) Prompt Iteration

B) Prompt Injection

C) Role Prompting

D) Ethical Prompting

Correct answer: B) Prompt Injection

WHY: This situation is an example of Prompt Injection. The key concept is: malicious instructions embedded in untrusted content to redirect an AI system. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A forged note hidden inside the source.

Q145. Which concept best matches this definition: a collection of tested prompts for recurring tasks?

A) Specificity

B) AI Assistant Evaluation

C) Reusable Prompt Library

D) Output Format Constraint

Correct answer: C) Reusable Prompt Library

WHY: Reusable Prompt Library means a collection of tested prompts for recurring tasks. Roman Urdu: Is definition ka central idea Reusable Prompt Library hai.

MENTAL MODEL: A toolbox of reusable instructions.

Q146. Which concept is BEST illustrated by this situation: a team stores approved email and summary prompts?

A) Output Validation

B) Output Format Constraint

C) Reusable Prompt Library

D) Zero-Shot Prompting

Correct answer: C) Reusable Prompt Library

WHY: This situation is an example of Reusable Prompt Library. The key concept is: a collection of tested prompts for recurring tasks. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A toolbox of reusable instructions.

Q147. Which concept best matches this definition: a design where multiple AI agents have separate roles?

A) Multi-Agent Workflow

B) System Instruction

C) Output Validation

D) One-Shot Prompting

Correct answer: A) Multi-Agent Workflow

WHY: Multi-Agent Workflow means a design where multiple AI agents have separate roles. Roman Urdu: Is definition ka central idea Multi-Agent Workflow hai.

MENTAL MODEL: A team of specialists with handoffs.

Q148. Which concept is BEST illustrated by this situation: one agent researches and another reviews a draft?

A) Prompt Iteration

B) Multi-Agent Workflow

C) Prompt Engineering

D) Persona Design

Correct answer: B) Multi-Agent Workflow

WHY: This situation is an example of Multi-Agent Workflow. The key concept is: a design where multiple AI agents have separate roles. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A team of specialists with handoffs.

Q149. Which concept best matches this definition: testing whether an assistant meets quality and task goals?

A) Fact Checking

B) Prompt

C) Task Decomposition

D) AI Assistant Evaluation

Correct answer: D) AI Assistant Evaluation

WHY: AI Assistant Evaluation means testing whether an assistant meets quality and task goals. Roman Urdu: Is definition ka central idea AI Assistant Evaluation hai.

MENTAL MODEL: A report card for the assistant.

Q150. Which concept is BEST illustrated by this situation: a team scores responses for relevance, safety and correctness?

A) AI Assistant Evaluation

B) Multi-Agent Workflow

C) Reusable Prompt Library

D) Prompt Template

Correct answer: A) AI Assistant Evaluation

WHY: This situation is an example of AI Assistant Evaluation. The key concept is: testing whether an assistant meets quality and task goals. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A report card for the assistant.

Week 4

Q151. Which concept best matches this definition: a clearly defined issue or gap a study seeks to address?

A) Citation

B) Research Problem

C) Research Proposal

D) Research Methodology

Correct answer: B) Research Problem

WHY: Research Problem means a clearly defined issue or gap a study seeks to address. Roman Urdu: Is definition ka central idea Research Problem hai.

MENTAL MODEL: Start with the question that matters.

Q152. Which concept is BEST illustrated by this situation: a researcher asks why rural students struggle with online learning?

A) Qualitative Research

B) Research Problem

C) APA Style

D) Research Question

Correct answer: B) Research Problem

WHY: This situation is an example of Research Problem. The key concept is: a clearly defined issue or gap a study seeks to address. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Start with the question that matters.

Q153. Which concept best matches this definition: a specific outcome the study aims to achieve?

A) Abstract

B) Research Problem

C) Research Objective

D) Boolean Operators

Correct answer: C) Research Objective

WHY: Research Objective means a specific outcome the study aims to achieve. Roman Urdu: Is definition ka central idea Research Objective hai.

MENTAL MODEL: Objectives are destination markers.

Q154. Which concept is BEST illustrated by this situation: measure the effect of tutoring support on quiz scores?

A) Academic Database

B) Research Objective

C) Research Ethics

D) Quantitative Research

Correct answer: B) Research Objective

WHY: This situation is an example of Research Objective. The key concept is: a specific outcome the study aims to achieve. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Objectives are destination markers.

Q155. Which concept best matches this definition: an answerable question guiding a study?

A) Plagiarism

B) Research Problem

C) Introduction Section

D) Research Question

Correct answer: D) Research Question

WHY: Research Question means an answerable question guiding a study. Roman Urdu: Is definition ka central idea Research Question hai.

MENTAL MODEL: A compass for the investigation.

Q156. Which concept is BEST illustrated by this situation: does AI feedback improve student revision time?

A) Research Methodology

B) Abstract

C) Mixed Methods

D) Research Question

Correct answer: D) Research Question

WHY: This situation is an example of Research Question. The key concept is: an answerable question guiding a study. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A compass for the investigation.

Q157. Which concept best matches this definition: the boundaries of population, time and subject?

A) APA Style

B) Research Scope

C) Literature Review

D) IEEE Style

Correct answer: B) Research Scope

WHY: Research Scope means the boundaries of population, time and subject. Roman Urdu: Is definition ka central idea Research Scope hai.

MENTAL MODEL: Draw a fence around the study.

Q158. Which concept is BEST illustrated by this situation: a study includes first-year students in one college?

A) Abstract

B) Research Scope

C) Plagiarism

D) Research Gap

Correct answer: B) Research Scope

WHY: This situation is an example of Research Scope. The key concept is: the boundaries of population, time and subject. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Draw a fence around the study.

Q159. Which concept best matches this definition: the overall approach used to conduct research?

A) Research Methodology

B) Research Problem

C) Research Question

D) Research Ethics

Correct answer: A) Research Methodology

WHY: Research Methodology means the overall approach used to conduct research. Roman Urdu: Is definition ka central idea Research Methodology hai.

MENTAL MODEL: The research recipe.

Q160. Which concept is BEST illustrated by this situation: a project describes surveys, sampling and analysis?

A) Research Methodology

B) Quantitative Research

C) IEEE Style

D) Research Proposal

Correct answer: A) Research Methodology

WHY: This situation is an example of Research Methodology. The key concept is: the overall approach used to conduct research. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: The research recipe.

Q161. Which concept best matches this definition: research emphasizing numerical measurement and analysis?

A) Quantitative Research

B) Introduction Section

C) Academic Database

D) APA Style

Correct answer: A) Quantitative Research

WHY: Quantitative Research means research emphasizing numerical measurement and analysis. Roman Urdu: Is definition ka central idea Quantitative Research hai.

MENTAL MODEL: Numbers tell the story.

Q162. Which concept is BEST illustrated by this situation: a survey compares test scores across groups?

A) Research Problem

B) Quantitative Research

C) Mixed Methods

D) IEEE Style

Correct answer: B) Quantitative Research

WHY: This situation is an example of Quantitative Research. The key concept is: research emphasizing numerical measurement and analysis. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Numbers tell the story.

Q163. Which concept best matches this definition: research exploring experiences, meanings and perspectives?

A) Mixed Methods

B) Qualitative Research

C) Quantitative Research

D) Academic Database

Correct answer: B) Qualitative Research

WHY: Qualitative Research means research exploring experiences, meanings and perspectives. Roman Urdu: Is definition ka central idea Qualitative Research hai.

MENTAL MODEL: Words and experiences tell the story.

Q164. Which concept is BEST illustrated by this situation: interviews explore how students feel about AI?

A) Academic Database

B) Qualitative Research

C) Reference List

D) Introduction Section

Correct answer: B) Qualitative Research

WHY: This situation is an example of Qualitative Research. The key concept is: research exploring experiences, meanings and perspectives. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Words and experiences tell the story.

Q165. Which concept best matches this definition: combining qualitative and quantitative approaches?

A) Quantitative Research

B) Introduction Section

C) Research Scope

D) Mixed Methods

Correct answer: D) Mixed Methods

WHY: Mixed Methods means combining qualitative and quantitative approaches. Roman Urdu: Is definition ka central idea Mixed Methods hai.

MENTAL MODEL: Use two lenses for one issue.

Q166. Which concept is BEST illustrated by this situation: a study uses surveys plus interviews?

A) Mixed Methods

B) Research Methodology

C) Research Proposal

D) Research Question

Correct answer: A) Mixed Methods

WHY: This situation is an example of Mixed Methods. The key concept is: combining qualitative and quantitative approaches. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Use two lenses for one issue.

Q167. Which concept best matches this definition: a critical synthesis of existing research on a topic?

A) Research Ethics

B) Qualitative Research

C) Literature Review

D) Research Gap

Correct answer: C) Literature Review

WHY: Literature Review means a critical synthesis of existing research on a topic. Roman Urdu: Is definition ka central idea Literature Review hai.

MENTAL MODEL: Map what scholars already know.

Q168. Which concept is BEST illustrated by this situation: a paper compares findings from multiple prior studies?

A) Citation

B) Boolean Operators

C) APA Style

D) Literature Review

Correct answer: D) Literature Review

WHY: This situation is an example of Literature Review. The key concept is: a critical synthesis of existing research on a topic. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Map what scholars already know.

Q169. Which concept best matches this definition: a scholarly work evaluated by relevant experts before publication?

A) Qualitative Research

B) Research Proposal

C) Peer-Reviewed Article

D) Research Problem

Correct answer: C) Peer-Reviewed Article

WHY: Peer-Reviewed Article means a scholarly work evaluated by relevant experts before publication. Roman Urdu: Is definition ka central idea Peer-Reviewed Article hai.

MENTAL MODEL: Expert checking before publication.

Q170. Which concept is BEST illustrated by this situation: a journal sends a manuscript to external reviewers?

A) Peer-Reviewed Article

B) Plagiarism

C) Reference List

D) Research Objective

Correct answer: A) Peer-Reviewed Article

WHY: This situation is an example of Peer-Reviewed Article. The key concept is: a scholarly work evaluated by relevant experts before publication. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Expert checking before publication.

Q171. Which concept best matches this definition: an unanswered or insufficiently studied question in existing literature?

A) Source Verification

B) Reference List

C) Mixed Methods

D) Research Gap

Correct answer: D) Research Gap

WHY: Research Gap means an unanswered or insufficiently studied question in existing literature. Roman Urdu: Is definition ka central idea Research Gap hai.

MENTAL MODEL: Find the missing puzzle piece.

Q172. Which concept is BEST illustrated by this situation: few studies test AI tutoring in low-bandwidth settings?

A) Research Gap

B) Research Proposal

C) Abstract

D) Research Objective

Correct answer: A) Research Gap

WHY: This situation is an example of Research Gap. The key concept is: an unanswered or insufficiently studied question in existing literature. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Find the missing puzzle piece.

Q173. Which concept best matches this definition: a service for discovering scholarly publications?

A) IEEE Style

B) Academic Database

C) Literature Review

D) Search Keywords

Correct answer: B) Academic Database

WHY: Academic Database means a service for discovering scholarly publications. Roman Urdu: Is definition ka central idea Academic Database hai.

MENTAL MODEL: A catalog of research shelves.

Q174. Which concept is BEST illustrated by this situation: a student searches a research index for papers?

A) Research Scope

B) Academic Database

C) Research Problem

D) Systematic Review

Correct answer: B) Academic Database

WHY: This situation is an example of Academic Database. The key concept is: a service for discovering scholarly publications. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A catalog of research shelves.

Q175. Which concept best matches this definition: terms used to retrieve relevant research?

A) Search Keywords

B) Qualitative Research

C) Abstract

D) Boolean Operators

Correct answer: A) Search Keywords

WHY: Search Keywords means terms used to retrieve relevant research. Roman Urdu: Is definition ka central idea Search Keywords hai.

MENTAL MODEL: Keywords are search handles.

Q176. Which concept is BEST illustrated by this situation: a researcher searches AI tutoring AND higher education?

A) Qualitative Research

B) Research Proposal

C) Search Keywords

D) Research Methodology

Correct answer: C) Search Keywords

WHY: This situation is an example of Search Keywords. The key concept is: terms used to retrieve relevant research. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Keywords are search handles.

Q177. Which concept best matches this definition: aND OR and NOT used to combine search terms?

A) Citation

B) Boolean Operators

C) Academic Database

D) Qualitative Research

Correct answer: B) Boolean Operators

WHY: Boolean Operators means aND OR and NOT used to combine search terms. Roman Urdu: Is definition ka central idea Boolean Operators hai.

MENTAL MODEL: Search logic acts like filters.

Q178. Which concept is BEST illustrated by this situation: aI AND education narrows a literature search?

A) Peer-Reviewed Article

B) Boolean Operators

C) Introduction Section

D) Search Keywords

Correct answer: B) Boolean Operators

WHY: This situation is an example of Boolean Operators. The key concept is: aND OR and NOT used to combine search terms. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Search logic acts like filters.

Q179. Which concept best matches this definition: a literature review using predefined reproducible search and selection methods?

A) Systematic Review

B) Abstract

C) Mixed Methods

D) Qualitative Research

Correct answer: A) Systematic Review

WHY: Systematic Review means a literature review using predefined reproducible search and selection methods. Roman Urdu: Is definition ka central idea Systematic Review hai.

MENTAL MODEL: A documented recipe for reviewing evidence.

Q180. Which concept is BEST illustrated by this situation: a team records eligibility criteria for selecting studies?

A) Plagiarism

B) Mixed Methods

C) Systematic Review

D) Peer-Reviewed Article

Correct answer: C) Systematic Review

WHY: This situation is an example of Systematic Review. The key concept is: a literature review using predefined reproducible search and selection methods. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A documented recipe for reviewing evidence.

Q181. Which concept best matches this definition: a concise summary of a research paper?

A) Search Keywords

B) Literature Review

C) Abstract

D) Qualitative Research

Correct answer: C) Abstract

WHY: Abstract means a concise summary of a research paper. Roman Urdu: Is definition ka central idea Abstract hai.

MENTAL MODEL: The research paper in miniature.

Q182. Which concept is BEST illustrated by this situation: a paper opens with purpose, methods and key findings?

A) Systematic Review

B) Plagiarism

C) Search Keywords

D) Abstract

Correct answer: D) Abstract

WHY: This situation is an example of Abstract. The key concept is: a concise summary of a research paper. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: The research paper in miniature.

Q183. Which concept best matches this definition: a section establishing background, problem and study purpose?

A) Research Gap

B) Research Question

C) Introduction Section

D) Research Scope

Correct answer: C) Introduction Section

WHY: Introduction Section means a section establishing background, problem and study purpose. Roman Urdu: Is definition ka central idea Introduction Section hai.

MENTAL MODEL: Open the door to the study.

Q184. Which concept is BEST illustrated by this situation: an article explains why the research question matters?

A) Introduction Section

B) APA Style

C) Research Gap

D) Research Question

Correct answer: A) Introduction Section

WHY: This situation is an example of Introduction Section. The key concept is: a section establishing background, problem and study purpose. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Open the door to the study.

Q185. Which concept best matches this definition: an in-text acknowledgement identifying a source?

A) Research Problem

B) Citation

C) Source Verification

D) Qualitative Research

Correct answer: B) Citation

WHY: Citation means an in-text acknowledgement identifying a source. Roman Urdu: Is definition ka central idea Citation hai.

MENTAL MODEL: A signpost to the evidence.

Q186. Which concept is BEST illustrated by this situation: a paragraph credits the study behind a claim?

A) Research Question

B) Quantitative Research

C) Citation

D) APA Style

Correct answer: C) Citation

WHY: This situation is an example of Citation. The key concept is: an in-text acknowledgement identifying a source. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A signpost to the evidence.

Q187. Which concept best matches this definition: full bibliographic details of sources cited in a work?

A) Research Objective

B) Research Scope

C) Reference List

D) Abstract

Correct answer: C) Reference List

WHY: Reference List means full bibliographic details of sources cited in a work. Roman Urdu: Is definition ka central idea Reference List hai.

MENTAL MODEL: The address book of sources.

Q188. Which concept is BEST illustrated by this situation: the paper ends with publication details for cited studies?

A) Research Gap

B) Reference List

C) Mixed Methods

D) Citation

Correct answer: B) Reference List

WHY: This situation is an example of Reference List. The key concept is: full bibliographic details of sources cited in a work. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: The address book of sources.

Q189. Which concept best matches this definition: an academic referencing style commonly using author-date citations?

A) APA Style

B) Academic Database

C) Research Objective

D) Plagiarism

Correct answer: A) APA Style

WHY: APA Style means an academic referencing style commonly using author-date citations. Roman Urdu: Is definition ka central idea APA Style hai.

MENTAL MODEL: APA often signals author plus year.

Q190. Which concept is BEST illustrated by this situation: a paper cites an author and year in the text?

A) APA Style

B) Research Ethics

C) Abstract

D) Research Scope

Correct answer: A) APA Style

WHY: This situation is an example of APA Style. The key concept is: an academic referencing style commonly using author-date citations. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: APA often signals author plus year.

Q191. Which concept best matches this definition: a referencing style commonly using numbered citations?

A) Qualitative Research

B) Research Objective

C) IEEE Style

D) Reference List

Correct answer: C) IEEE Style

WHY: IEEE Style means a referencing style commonly using numbered citations. Roman Urdu: Is definition ka central idea IEEE Style hai.

MENTAL MODEL: IEEE uses numbered signposts.

Q192. Which concept is BEST illustrated by this situation: a technical paper cites sources as bracketed numbers?

A) Research Methodology

B) IEEE Style

C) Quantitative Research

D) Citation

Correct answer: B) IEEE Style

WHY: This situation is an example of IEEE Style. The key concept is: a referencing style commonly using numbered citations. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: IEEE uses numbered signposts.

Q193. Which concept best matches this definition: presenting another person's work or ideas without proper acknowledgement?

A) Source Verification

B) Boolean Operators

C) Plagiarism

D) Search Keywords

Correct answer: C) Plagiarism

WHY: Plagiarism means presenting another person's work or ideas without proper acknowledgement. Roman Urdu: Is definition ka central idea Plagiarism hai.

MENTAL MODEL: Taking credit for someone else's work.

Q194. Which concept is BEST illustrated by this situation: a student copies a paragraph without attribution?

A) APA Style

B) Mixed Methods

C) Plagiarism

D) Source Verification

Correct answer: C) Plagiarism

WHY: This situation is an example of Plagiarism. The key concept is: presenting another person's work or ideas without proper acknowledgement. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Taking credit for someone else's work.

Q195. Which concept best matches this definition: principles governing responsible treatment of participants and information?

A) Research Ethics

B) Academic Database

C) Research Proposal

D) Systematic Review

Correct answer: A) Research Ethics

WHY: Research Ethics means principles governing responsible treatment of participants and information. Roman Urdu: Is definition ka central idea Research Ethics hai.

MENTAL MODEL: Ethics are guardrails for research.

Q196. Which concept is BEST illustrated by this situation: a study obtains informed consent before interviews?

A) Search Keywords

B) Research Proposal

C) Boolean Operators

D) Research Ethics

Correct answer: D) Research Ethics

WHY: This situation is an example of Research Ethics. The key concept is: principles governing responsible treatment of participants and information. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Ethics are guardrails for research.

Q197. Which concept best matches this definition: a plan describing intended research and how it will be conducted?

A) IEEE Style

B) Research Question

C) Research Proposal

D) Quantitative Research

Correct answer: C) Research Proposal

WHY: Research Proposal means a plan describing intended research and how it will be conducted. Roman Urdu: Is definition ka central idea Research Proposal hai.

MENTAL MODEL: A blueprint before the study.

Q198. Which concept is BEST illustrated by this situation: a team drafts aims, methods, timeline and expected value?

A) IEEE Style

B) Research Scope

C) Research Proposal

D) Mixed Methods

Correct answer: C) Research Proposal

WHY: This situation is an example of Research Proposal. The key concept is: a plan describing intended research and how it will be conducted. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A blueprint before the study.

Q199. Which concept best matches this definition: checking whether cited sources exist and support claims?

A) Plagiarism

B) Research Scope

C) Source Verification

D) Peer-Reviewed Article

Correct answer: C) Source Verification

WHY: Source Verification means checking whether cited sources exist and support claims. Roman Urdu: Is definition ka central idea Source Verification hai.

MENTAL MODEL: Check the source before quoting it.

Q200. Which concept is BEST illustrated by this situation: a student opens a cited paper to confirm a statistic?

A) Research Methodology

B) Research Scope

C) IEEE Style

D) Source Verification

Correct answer: D) Source Verification

WHY: This situation is an example of Source Verification. The key concept is: checking whether cited sources exist and support claims. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Check the source before quoting it.

Week 5

Q201. Which concept best matches this definition: creating new written or visual material using AI models?

A) Content Generation

B) Campaign Strategy

C) Business Report

D) Brand Voice

Correct answer: A) Content Generation

WHY: Content Generation means creating new written or visual material using AI models. Roman Urdu: Is definition ka central idea Content Generation hai.

MENTAL MODEL: AI acts as a first-draft studio.

Q202. Which concept is BEST illustrated by this situation: an AI assistant drafts a blog introduction?

A) Content Generation

B) Social Media Caption

C) Engagement Metric

D) Video Script

Correct answer: A) Content Generation

WHY: This situation is an example of Content Generation. The key concept is: creating new written or visual material using AI models. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: AI acts as a first-draft studio.

Q203. Which concept best matches this definition: an article written for an online audience?

A) Copywriting

B) Content Editing

C) Brand Voice

D) Blog Post

Correct answer: D) Blog Post

WHY: Blog Post means an article written for an online audience. Roman Urdu: Is definition ka central idea Blog Post hai.

MENTAL MODEL: A longer story for readers.

Q204. Which concept is BEST illustrated by this situation: a startup publishes an educational product article?

A) Blog Post

B) Call to Action

C) Multimedia Content

D) Infographic

Correct answer: A) Blog Post

WHY: This situation is an example of Blog Post. The key concept is: an article written for an online audience. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A longer story for readers.

Q205. Which concept best matches this definition: copy explaining a product's features and benefits?

A) Professional Email

B) Email Marketing

C) Brand Voice

D) Product Description

Correct answer: D) Product Description

WHY: Product Description means copy explaining a product's features and benefits. Roman Urdu: Is definition ka central idea Product Description hai.

MENTAL MODEL: Tell buyers what it is and why it helps.

Q206. Which concept is BEST illustrated by this situation: a shop writes a description of a reusable bottle?

A) Product Description

B) Multimedia Content

C) Image Prompt

D) Advertising Headline

Correct answer: A) Product Description

WHY: This situation is an example of Product Description. The key concept is: copy explaining a product's features and benefits. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Tell buyers what it is and why it helps.

Q207. Which concept best matches this definition: short text accompanying a social media post?

A) Video Script

B) Target Audience

C) Social Media Caption

D) Campaign Strategy

Correct answer: C) Social Media Caption

WHY: Social Media Caption means short text accompanying a social media post. Roman Urdu: Is definition ka central idea Social Media Caption hai.

MENTAL MODEL: A compact message beside the post.

Q208. Which concept is BEST illustrated by this situation: a brand writes a caption for a product launch?

A) Call to Action

B) Social Media Caption

C) Image Prompt

D) Responsible AI Media

Correct answer: B) Social Media Caption

WHY: This situation is an example of Social Media Caption. The key concept is: short text accompanying a social media post. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A compact message beside the post.

Q209. Which concept best matches this definition: the group a message is intended to reach?

A) Social Media Caption

B) Target Audience

C) Content Portfolio

D) Visual Storytelling

Correct answer: B) Target Audience

WHY: Target Audience means the group a message is intended to reach. Roman Urdu: Is definition ka central idea Target Audience hai.

MENTAL MODEL: Know who is listening.

Q210. Which concept is BEST illustrated by this situation: a campaign addresses university students?

A) Content Generation

B) Campaign Strategy

C) Target Audience

D) Content Editing

Correct answer: C) Target Audience

WHY: This situation is an example of Target Audience. The key concept is: the group a message is intended to reach. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Know who is listening.

Q211. Which concept best matches this definition: the consistent personality and tone of a brand's communication?

A) Blog Post

B) Brand Voice

C) Copywriting

D) Content Generation

Correct answer: B) Brand Voice

WHY: Brand Voice means the consistent personality and tone of a brand's communication. Roman Urdu: Is definition ka central idea Brand Voice hai.

MENTAL MODEL: A recognizable speaking style.

Q212. Which concept is BEST illustrated by this situation: a company uses friendly and clear wording across channels?

A) Content Portfolio

B) Campaign Strategy

C) Multimedia Content

D) Brand Voice

Correct answer: D) Brand Voice

WHY: This situation is an example of Brand Voice. The key concept is: the consistent personality and tone of a brand's communication. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A recognizable speaking style.

Q213. Which concept best matches this definition: text prompting an audience to take a desired next step?

A) Project Proposal

B) Call to Action

C) Product Description

D) Advertising Headline

Correct answer: B) Call to Action

WHY: Call to Action means text prompting an audience to take a desired next step. Roman Urdu: Is definition ka central idea Call to Action hai.

MENTAL MODEL: The next-step signpost.

Q214. Which concept is BEST illustrated by this situation: an advertisement says sign up for the webinar?

A) Call to Action

B) Content Portfolio

C) Blog Post

D) Meeting Summary

Correct answer: A) Call to Action

WHY: This situation is an example of Call to Action. The key concept is: text prompting an audience to take a desired next step. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: The next-step signpost.

Q215. Which concept best matches this definition: writing persuasive text for marketing or advertising?

A) Brand Voice

B) Content Generation

C) Copywriting

D) Meeting Summary

Correct answer: C) Copywriting

WHY: Copywriting means writing persuasive text for marketing or advertising. Roman Urdu: Is definition ka central idea Copywriting hai.

MENTAL MODEL: Words designed to motivate action.

Q216. Which concept is BEST illustrated by this situation: a marketer crafts a headline to increase signups?

A) Responsible AI Media

B) Copywriting

C) Content Editing

D) Engagement Metric

Correct answer: B) Copywriting

WHY: This situation is an example of Copywriting. The key concept is: writing persuasive text for marketing or advertising. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Words designed to motivate action.

Q217. Which concept best matches this definition: using email messages to communicate promotions or updates?

A) Business Report

B) Professional Email

C) Email Marketing

D) Advertising Headline

Correct answer: C) Email Marketing

WHY: Email Marketing means using email messages to communicate promotions or updates. Roman Urdu: Is definition ka central idea Email Marketing hai.

MENTAL MODEL: A message delivered to the inbox.

Q218. Which concept is BEST illustrated by this situation: a store sends a seasonal offer to subscribers?

A) Email Marketing

B) Content Personalization

C) Content Generation

D) Social Media Caption

Correct answer: A) Email Marketing

WHY: This situation is an example of Email Marketing. The key concept is: using email messages to communicate promotions or updates. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A message delivered to the inbox.

Q219. Which concept best matches this definition: a short attention-grabbing title for an advertisement?

A) Project Proposal

B) Responsible AI Media

C) Infographic

D) Advertising Headline

Correct answer: D) Advertising Headline

WHY: Advertising Headline means a short attention-grabbing title for an advertisement. Roman Urdu: Is definition ka central idea Advertising Headline hai.

MENTAL MODEL: The shop-window sign.

Q220. Which concept is BEST illustrated by this situation: a campaign opens with a brief product benefit?

A) Image Prompt

B) Business Report

C) Project Proposal

D) Advertising Headline

Correct answer: D) Advertising Headline

WHY: This situation is an example of Advertising Headline. The key concept is: a short attention-grabbing title for an advertisement. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: The shop-window sign.

Q221. Which concept best matches this definition: a coordinated plan to achieve marketing objectives?

A) Responsible AI Media

B) Content Generation

C) Campaign Strategy

D) Content Portfolio

Correct answer: C) Campaign Strategy

WHY: Campaign Strategy means a coordinated plan to achieve marketing objectives. Roman Urdu: Is definition ka central idea Campaign Strategy hai.

MENTAL MODEL: Many channels with one goal.

Q222. Which concept is BEST illustrated by this situation: a retailer aligns email, social and website promotions?

A) Campaign Strategy

B) Multimedia Content

C) Professional Email

D) Content Editing

Correct answer: A) Campaign Strategy

WHY: This situation is an example of Campaign Strategy. The key concept is: a coordinated plan to achieve marketing objectives. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Many channels with one goal.

Q223. Which concept best matches this definition: tailoring content to audience needs or preferences?

A) Content Personalization

B) Content Portfolio

C) Engagement Metric

D) Video Script

Correct answer: A) Content Personalization

WHY: Content Personalization means tailoring content to audience needs or preferences. Roman Urdu: Is definition ka central idea Content Personalization hai.

MENTAL MODEL: Different readers get relevant messages.

Q224. Which concept is BEST illustrated by this situation: a newsletter changes recommendations by interest?

A) Content Personalization

B) Copywriting

C) Meeting Summary

D) Infographic

Correct answer: A) Content Personalization

WHY: This situation is an example of Content Personalization. The key concept is: tailoring content to audience needs or preferences. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Different readers get relevant messages.

Q225. Which concept best matches this definition: a text description guiding AI image generation?

A) Image Prompt

B) Responsible AI Media

C) Infographic

D) Content Portfolio

Correct answer: A) Image Prompt

WHY: Image Prompt means a text description guiding AI image generation. Roman Urdu: Is definition ka central idea Image Prompt hai.

MENTAL MODEL: A creative brief for an image.

Q226. Which concept is BEST illustrated by this situation: a designer specifies subject, lighting and composition?

A) Professional Email

B) Image Prompt

C) Target Audience

D) Email Marketing

Correct answer: B) Image Prompt

WHY: This situation is an example of Image Prompt. The key concept is: a text description guiding AI image generation. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A creative brief for an image.

Q227. Which concept best matches this definition: a visual presentation combining concise text and graphics?

A) Copywriting

B) Professional Email

C) Infographic

D) Visual Storytelling

Correct answer: C) Infographic

WHY: Infographic means a visual presentation combining concise text and graphics. Roman Urdu: Is definition ka central idea Infographic hai.

MENTAL MODEL: Information drawn as a quick map.

Q228. Which concept is BEST illustrated by this situation: a university illustrates admission steps visually?

A) Video Script

B) Content Portfolio

C) Infographic

D) Visual Storytelling

Correct answer: C) Infographic

WHY: This situation is an example of Infographic. The key concept is: a visual presentation combining concise text and graphics. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Information drawn as a quick map.

Q229. Which concept best matches this definition: a written plan for spoken words and scenes in a video?

A) Business Report

B) Brand Voice

C) Video Script

D) Project Proposal

Correct answer: C) Video Script

WHY: Video Script means a written plan for spoken words and scenes in a video. Roman Urdu: Is definition ka central idea Video Script hai.

MENTAL MODEL: A screenplay before filming.

Q230. Which concept is BEST illustrated by this situation: a marketing team drafts a 30-second ad script?

A) Product Description

B) Social Media Caption

C) Copywriting

D) Video Script

Correct answer: D) Video Script

WHY: This situation is an example of Video Script. The key concept is: a written plan for spoken words and scenes in a video. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A screenplay before filming.

Q231. Which concept best matches this definition: communicating a narrative through imagery and design?

A) Content Generation

B) Advertising Headline

C) Visual Storytelling

D) Multimedia Content

Correct answer: C) Visual Storytelling

WHY: Visual Storytelling means communicating a narrative through imagery and design. Roman Urdu: Is definition ka central idea Visual Storytelling hai.

MENTAL MODEL: Show the story with pictures.

Q232. Which concept is BEST illustrated by this situation: a sequence of graphics shows a customer's journey?

A) Advertising Headline

B) Blog Post

C) Copywriting

D) Visual Storytelling

Correct answer: D) Visual Storytelling

WHY: This situation is an example of Visual Storytelling. The key concept is: communicating a narrative through imagery and design. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Show the story with pictures.

Q233. Which concept best matches this definition: content combining formats such as text, audio and visuals?

A) Image Prompt

B) Multimedia Content

C) Engagement Metric

D) Infographic

Correct answer: B) Multimedia Content

WHY: Multimedia Content means content combining formats such as text, audio and visuals. Roman Urdu: Is definition ka central idea Multimedia Content hai.

MENTAL MODEL: Several media working together.

Q234. Which concept is BEST illustrated by this situation: a campaign uses narration, captions and illustrations?

A) Engagement Metric

B) Multimedia Content

C) Professional Email

D) Content Editing

Correct answer: B) Multimedia Content

WHY: This situation is an example of Multimedia Content. The key concept is: content combining formats such as text, audio and visuals. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Several media working together.

Q235. Which concept best matches this definition: a structured document presenting findings and recommendations?

A) Visual Storytelling

B) Responsible AI Media

C) Call to Action

D) Business Report

Correct answer: D) Business Report

WHY: Business Report means a structured document presenting findings and recommendations. Roman Urdu: Is definition ka central idea Business Report hai.

MENTAL MODEL: A decision-making briefing.

Q236. Which concept is BEST illustrated by this situation: a consultant summarizes customer service metrics?

A) Campaign Strategy

B) Engagement Metric

C) Business Report

D) Blog Post

Correct answer: C) Business Report

WHY: This situation is an example of Business Report. The key concept is: a structured document presenting findings and recommendations. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A decision-making briefing.

Q237. Which concept best matches this definition: a document suggesting a project, scope and approach?

A) Advertising Headline

B) Responsible AI Media

C) Engagement Metric

D) Project Proposal

Correct answer: D) Project Proposal

WHY: Project Proposal means a document suggesting a project, scope and approach. Roman Urdu: Is definition ka central idea Project Proposal hai.

MENTAL MODEL: A plan asking for approval.

Q238. Which concept is BEST illustrated by this situation: a firm proposes a chatbot pilot to a client?

A) Project Proposal

B) Advertising Headline

C) Content Generation

D) Responsible AI Media

Correct answer: A) Project Proposal

WHY: This situation is an example of Project Proposal. The key concept is: a document suggesting a project, scope and approach. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A plan asking for approval.

Q239. Which concept best matches this definition: a concise record of discussion, decisions and actions?

A) Meeting Summary

B) Professional Email

C) Campaign Strategy

D) Brand Voice

Correct answer: A) Meeting Summary

WHY: Meeting Summary means a concise record of discussion, decisions and actions. Roman Urdu: Is definition ka central idea Meeting Summary hai.

MENTAL MODEL: The meeting's takeaway sheet.

Q240. Which concept is BEST illustrated by this situation: an AI assistant extracts action items from meeting notes?

A) Social Media Caption

B) Meeting Summary

C) Responsible AI Media

D) Content Portfolio

Correct answer: B) Meeting Summary

WHY: This situation is an example of Meeting Summary. The key concept is: a concise record of discussion, decisions and actions. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: The meeting's takeaway sheet.

Q241. Which concept best matches this definition: a formal or appropriate business message with clear purpose?

A) Professional Email

B) Infographic

C) Engagement Metric

D) Content Generation

Correct answer: A) Professional Email

WHY: Professional Email means a formal or appropriate business message with clear purpose. Roman Urdu: Is definition ka central idea Professional Email hai.

MENTAL MODEL: A focused business conversation.

Q242. Which concept is BEST illustrated by this situation: a consultant emails a client with project findings?

A) Blog Post

B) Multimedia Content

C) Professional Email

D) Content Generation

Correct answer: C) Professional Email

WHY: This situation is an example of Professional Email. The key concept is: a formal or appropriate business message with clear purpose. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A focused business conversation.

Q243. Which concept best matches this definition: reviewing and improving a draft for accuracy and clarity?

A) Video Script

B) Content Editing

C) Brand Voice

D) Infographic

Correct answer: B) Content Editing

WHY: Content Editing means reviewing and improving a draft for accuracy and clarity. Roman Urdu: Is definition ka central idea Content Editing hai.

MENTAL MODEL: Polish before publishing.

Q244. Which concept is BEST illustrated by this situation: a writer corrects unsupported claims in AI copy?

A) Content Editing

B) Call to Action

C) Blog Post

D) Responsible AI Media

Correct answer: A) Content Editing

WHY: This situation is an example of Content Editing. The key concept is: reviewing and improving a draft for accuracy and clarity. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Polish before publishing.

Q245. Which concept best matches this definition: a curated collection demonstrating creative work?

A) Social Media Caption

B) Content Portfolio

C) Brand Voice

D) Infographic

Correct answer: B) Content Portfolio

WHY: Content Portfolio means a curated collection demonstrating creative work. Roman Urdu: Is definition ka central idea Content Portfolio hai.

MENTAL MODEL: A display shelf of best work.

Q246. Which concept is BEST illustrated by this situation: a freelancer showcases blogs, ads and designs?

A) Advertising Headline

B) Campaign Strategy

C) Content Portfolio

D) Product Description

Correct answer: C) Content Portfolio

WHY: This situation is an example of Content Portfolio. The key concept is: a curated collection demonstrating creative work. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A display shelf of best work.

Q247. Which concept best matches this definition: a measurement of audience interaction with content?

A) Responsible AI Media

B) Video Script

C) Meeting Summary

D) Engagement Metric

Correct answer: D) Engagement Metric

WHY: Engagement Metric means a measurement of audience interaction with content. Roman Urdu: Is definition ka central idea Engagement Metric hai.

MENTAL MODEL: Signals that people responded.

Q248. Which concept is BEST illustrated by this situation: a marketer tracks clicks and comments?

A) Copywriting

B) Engagement Metric

C) Video Script

D) Responsible AI Media

Correct answer: B) Engagement Metric

WHY: This situation is an example of Engagement Metric. The key concept is: a measurement of audience interaction with content. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Signals that people responded.

Q249. Which concept best matches this definition: creating media while respecting consent, truthfulness and rights?

A) Visual Storytelling

B) Blog Post

C) Responsible AI Media

D) Product Description

Correct answer: C) Responsible AI Media

WHY: Responsible AI Media means creating media while respecting consent, truthfulness and rights. Roman Urdu: Is definition ka central idea Responsible AI Media hai.

MENTAL MODEL: Creativity with responsibility.

Q250. Which concept is BEST illustrated by this situation: a creator labels synthetic images when appropriate?

A) Responsible AI Media

B) Visual Storytelling

C) Copywriting

D) Image Prompt

Correct answer: A) Responsible AI Media

WHY: This situation is an example of Responsible AI Media. The key concept is: creating media while respecting consent, truthfulness and rights. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Creativity with responsibility.

Week 6

Q251. Which concept best matches this definition: inspecting and interpreting data to answer questions?

A) Forecast Error

B) Data Transformation

C) Data Analysis

D) Dashboard

Correct answer: C) Data Analysis

WHY: Data Analysis means inspecting and interpreting data to answer questions. Roman Urdu: Is definition ka central idea Data Analysis hai.

MENTAL MODEL: Turn raw numbers into decisions.

Q252. Which concept is BEST illustrated by this situation: a store examines monthly sales records?

A) Data Validation

B) Dashboard

C) KPI

D) Data Analysis

Correct answer: D) Data Analysis

WHY: This situation is an example of Data Analysis. The key concept is: inspecting and interpreting data to answer questions. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Turn raw numbers into decisions.

Q253. Which concept best matches this definition: data organized in predefined fields and records?

A) Data Cleaning

B) Structured Data

C) Predictive Analytics

D) Pie Chart

Correct answer: B) Structured Data

WHY: Structured Data means data organized in predefined fields and records. Roman Urdu: Is definition ka central idea Structured Data hai.

MENTAL MODEL: Information arranged in rows and columns.

Q254. Which concept is BEST illustrated by this situation: a spreadsheet lists date, product and revenue?

A) Business Intelligence

B) Missing Value

C) Structured Data

D) Prescriptive Analytics

Correct answer: C) Structured Data

WHY: This situation is an example of Structured Data. The key concept is: data organized in predefined fields and records. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Information arranged in rows and columns.

Q255. Which concept best matches this definition: information without a fixed tabular schema?

A) Line Chart

B) Unstructured Data

C) Prescriptive Analytics

D) Bar Chart

Correct answer: B) Unstructured Data

WHY: Unstructured Data means information without a fixed tabular schema. Roman Urdu: Is definition ka central idea Unstructured Data hai.

MENTAL MODEL: Information outside neat boxes.

Q256. Which concept is BEST illustrated by this situation: customer emails and photographs are analyzed?

A) Unstructured Data

B) Forecasting

C) Forecast Error

D) Business Intelligence

Correct answer: A) Unstructured Data

WHY: This situation is an example of Unstructured Data. The key concept is: information without a fixed tabular schema. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Information outside neat boxes.

Q257. Which concept best matches this definition: summarizing what has happened in data?

A) Missing Value

B) Data Transformation

C) Median

D) Descriptive Analytics

Correct answer: D) Descriptive Analytics

WHY: Descriptive Analytics means summarizing what has happened in data. Roman Urdu: Is definition ka central idea Descriptive Analytics hai.

MENTAL MODEL: Look in the rear-view mirror.

Q258. Which concept is BEST illustrated by this situation: a dashboard reports last month's total sales?

A) Outlier

B) Feature Engineering

C) Descriptive Analytics

D) Structured Data

Correct answer: C) Descriptive Analytics

WHY: This situation is an example of Descriptive Analytics. The key concept is: summarizing what has happened in data. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Look in the rear-view mirror.

Q259. Which concept best matches this definition: estimating future outcomes using data and models?

A) Outlier

B) Pie Chart

C) Business Intelligence

D) Predictive Analytics

Correct answer: D) Predictive Analytics

WHY: Predictive Analytics means estimating future outcomes using data and models. Roman Urdu: Is definition ka central idea Predictive Analytics hai.

MENTAL MODEL: Look ahead using patterns.

Q260. Which concept is BEST illustrated by this situation: a factory forecasts next quarter demand?

A) Forecasting

B) Predictive Analytics

C) Data Cleaning

D) Prescriptive Analytics

Correct answer: B) Predictive Analytics

WHY: This situation is an example of Predictive Analytics. The key concept is: estimating future outcomes using data and models. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Look ahead using patterns.

Q261. Which concept best matches this definition: recommending actions based on data and objectives?

A) KPI

B) Prescriptive Analytics

C) Data Privacy in Analytics

D) Pie Chart

Correct answer: B) Prescriptive Analytics

WHY: Prescriptive Analytics means recommending actions based on data and objectives. Roman Urdu: Is definition ka central idea Prescriptive Analytics hai.

MENTAL MODEL: Suggest what to do next.

Q262. Which concept is BEST illustrated by this situation: a system suggests stock reorder quantities?

A) KPI

B) Business Intelligence

C) Prescriptive Analytics

D) Data Privacy in Analytics

Correct answer: C) Prescriptive Analytics

WHY: This situation is an example of Prescriptive Analytics. The key concept is: recommending actions based on data and objectives. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Suggest what to do next.

Q263. Which concept best matches this definition: detecting and correcting problems in datasets?

A) Data Transformation

B) Data Cleaning

C) Duplicate Record

D) KPI

Correct answer: B) Data Cleaning

WHY: Data Cleaning means detecting and correcting problems in datasets. Roman Urdu: Is definition ka central idea Data Cleaning hai.

MENTAL MODEL: Wash the data before cooking.

Q264. Which concept is BEST illustrated by this situation: a team fixes invalid dates and duplicates?

A) Data Analysis

B) Dashboard

C) Data Cleaning

D) Trend Analysis

Correct answer: C) Data Cleaning

WHY: This situation is an example of Data Cleaning. The key concept is: detecting and correcting problems in datasets. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Wash the data before cooking.

Q265. Which concept best matches this definition: a field with no recorded value?

A) Missing Value

B) Bar Chart

C) Trend Analysis

D) Forecasting

Correct answer: A) Missing Value

WHY: Missing Value means a field with no recorded value. Roman Urdu: Is definition ka central idea Missing Value hai.

MENTAL MODEL: An empty cell needs attention.

Q266. Which concept is BEST illustrated by this situation: a patient record lacks an age entry?

A) Missing Value

B) Median

C) Forecasting

D) Pie Chart

Correct answer: A) Missing Value

WHY: This situation is an example of Missing Value. The key concept is: a field with no recorded value. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: An empty cell needs attention.

Q267. Which concept best matches this definition: a repeated observation that may distort analysis?

A) Pie Chart

B) Data Cleaning

C) Duplicate Record

D) Forecasting

Correct answer: C) Duplicate Record

WHY: Duplicate Record means a repeated observation that may distort analysis. Roman Urdu: Is definition ka central idea Duplicate Record hai.

MENTAL MODEL: Count the same receipt only once.

Q268. Which concept is BEST illustrated by this situation: one customer transaction appears twice?

A) Duplicate Record

B) Prescriptive Analytics

C) Structured Data

D) Descriptive Analytics

Correct answer: A) Duplicate Record

WHY: This situation is an example of Duplicate Record. The key concept is: a repeated observation that may distort analysis. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Count the same receipt only once.

Q269. Which concept best matches this definition: changing data into a suitable representation?

A) Forecasting

B) Business Intelligence

C) KPI

D) Data Transformation

Correct answer: D) Data Transformation

WHY: Data Transformation means changing data into a suitable representation. Roman Urdu: Is definition ka central idea Data Transformation hai.

MENTAL MODEL: Translate data into a useful format.

Q270. Which concept is BEST illustrated by this situation: a team converts date strings into date values?

A) Missing Value

B) Data Transformation

C) Bar Chart

D) Unstructured Data

Correct answer: B) Data Transformation

WHY: This situation is an example of Data Transformation. The key concept is: changing data into a suitable representation. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Translate data into a useful format.

Q271. Which concept best matches this definition: creating or selecting useful model input variables?

A) Outlier

B) Feature Engineering

C) Data Cleaning

D) Forecast Error

Correct answer: B) Feature Engineering

WHY: Feature Engineering means creating or selecting useful model input variables. Roman Urdu: Is definition ka central idea Feature Engineering hai.

MENTAL MODEL: Make informative ingredients for the model.

Q272. Which concept is BEST illustrated by this situation: a sales model uses day of week derived from dates?

A) Feature Engineering

B) Trend Analysis

C) Missing Value

D) Predictive Analytics

Correct answer: A) Feature Engineering

WHY: This situation is an example of Feature Engineering. The key concept is: creating or selecting useful model input variables. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Make informative ingredients for the model.

Q273. Which concept best matches this definition: checking whether data meets expected rules and constraints?

A) Structured Data

B) Data Validation

C) Median

D) Outlier

Correct answer: B) Data Validation

WHY: Data Validation means checking whether data meets expected rules and constraints. Roman Urdu: Is definition ka central idea Data Validation hai.

MENTAL MODEL: A gatekeeper checks the input.

Q274. Which concept is BEST illustrated by this situation: a form rejects an impossible negative quantity?

A) Unstructured Data

B) Data Validation

C) Data Analysis

D) Feature Engineering

Correct answer: B) Data Validation

WHY: This situation is an example of Data Validation. The key concept is: checking whether data meets expected rules and constraints. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A gatekeeper checks the input.

Q275. Which concept best matches this definition: arithmetic average of numerical values?

A) Data Cleaning

B) Line Chart

C) Mean

D) Prescriptive Analytics

Correct answer: C) Mean

WHY: Mean means arithmetic average of numerical values. Roman Urdu: Is definition ka central idea Mean hai.

MENTAL MODEL: Share the total evenly.

Q276. Which concept is BEST illustrated by this situation: an analyst calculates average daily sales?

A) Data Analysis

B) Forecast Error

C) Mean

D) Forecasting

Correct answer: C) Mean

WHY: This situation is an example of Mean. The key concept is: arithmetic average of numerical values. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Share the total evenly.

Q277. Which concept best matches this definition: middle value of ordered observations?

A) Median

B) Unstructured Data

C) Missing Value

D) Pie Chart

Correct answer: A) Median

WHY: Median means middle value of ordered observations. Roman Urdu: Is definition ka central idea Median hai.

MENTAL MODEL: The center person in a sorted line.

Q278. Which concept is BEST illustrated by this situation: a report uses the middle household income?

A) Median

B) Structured Data

C) Data Privacy in Analytics

D) Predictive Analytics

Correct answer: A) Median

WHY: This situation is an example of Median. The key concept is: middle value of ordered observations. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: The center person in a sorted line.

Q279. Which concept best matches this definition: an observation unusually distant from the rest?

A) Data Cleaning

B) Prescriptive Analytics

C) Outlier

D) Descriptive Analytics

Correct answer: C) Outlier

WHY: Outlier means an observation unusually distant from the rest. Roman Urdu: Is definition ka central idea Outlier hai.

MENTAL MODEL: A value standing far from the crowd.

Q280. Which concept is BEST illustrated by this situation: a store flags an exceptionally large transaction?

A) Business Intelligence

B) Unstructured Data

C) Outlier

D) Structured Data

Correct answer: C) Outlier

WHY: This situation is an example of Outlier. The key concept is: an observation unusually distant from the rest. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A value standing far from the crowd.

Q281. Which concept best matches this definition: studying patterns of change over time?

A) Trend Analysis

B) Data Cleaning

C) Predictive Analytics

D) Data Validation

Correct answer: A) Trend Analysis

WHY: Trend Analysis means studying patterns of change over time. Roman Urdu: Is definition ka central idea Trend Analysis hai.

MENTAL MODEL: Follow the direction of the line.

Q282. Which concept is BEST illustrated by this situation: a manager examines sales growth across months?

A) Trend Analysis

B) Outlier

C) Bar Chart

D) Data Analysis

Correct answer: A) Trend Analysis

WHY: This situation is an example of Trend Analysis. The key concept is: studying patterns of change over time. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Follow the direction of the line.

Q283. Which concept best matches this definition: a chart comparing values across categories?

A) Missing Value

B) Data Privacy in Analytics

C) Bar Chart

D) Feature Engineering

Correct answer: C) Bar Chart

WHY: Bar Chart means a chart comparing values across categories. Roman Urdu: Is definition ka central idea Bar Chart hai.

MENTAL MODEL: Bars compare groups.

Q284. Which concept is BEST illustrated by this situation: a report compares sales by product category?

A) Outlier

B) Bar Chart

C) Data Cleaning

D) Missing Value

Correct answer: B) Bar Chart

WHY: This situation is an example of Bar Chart. The key concept is: a chart comparing values across categories. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Bars compare groups.

Q285. Which concept best matches this definition: a chart showing changes across ordered or time-based values?

A) Unstructured Data

B) Line Chart

C) Predictive Analytics

D) Forecasting

Correct answer: B) Line Chart

WHY: Line Chart means a chart showing changes across ordered or time-based values. Roman Urdu: Is definition ka central idea Line Chart hai.

MENTAL MODEL: Connect points to see movement.

Q286. Which concept is BEST illustrated by this situation: a dashboard plots revenue over twelve months?

A) Data Validation

B) Line Chart

C) Structured Data

D) Missing Value

Correct answer: B) Line Chart

WHY: This situation is an example of Line Chart. The key concept is: a chart showing changes across ordered or time-based values. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Connect points to see movement.

Q287. Which concept best matches this definition: a chart showing how parts contribute to a whole?

A) Pie Chart

B) Forecasting

C) Data Validation

D) Dashboard

Correct answer: A) Pie Chart

WHY: Pie Chart means a chart showing how parts contribute to a whole. Roman Urdu: Is definition ka central idea Pie Chart hai.

MENTAL MODEL: Slices divide one pie.

Q288. Which concept is BEST illustrated by this situation: a report displays market share percentages?

A) Prescriptive Analytics

B) Pie Chart

C) Mean

D) Line Chart

Correct answer: B) Pie Chart

WHY: This situation is an example of Pie Chart. The key concept is: a chart showing how parts contribute to a whole. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Slices divide one pie.

Q289. Which concept best matches this definition: a consolidated display of key metrics and visuals?

A) Unstructured Data

B) Forecast Error

C) Data Validation

D) Dashboard

Correct answer: D) Dashboard

WHY: Dashboard means a consolidated display of key metrics and visuals. Roman Urdu: Is definition ka central idea Dashboard hai.

MENTAL MODEL: An instrument panel for the business.

Q290. Which concept is BEST illustrated by this situation: a manager views sales, returns and growth together?

A) Pie Chart

B) Dashboard

C) Data Analysis

D) Feature Engineering

Correct answer: B) Dashboard

WHY: This situation is an example of Dashboard. The key concept is: a consolidated display of key metrics and visuals. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: An instrument panel for the business.

Q291. Which concept best matches this definition: a measurable indicator of performance against an objective?

A) Duplicate Record

B) Business Intelligence

C) KPI

D) Prescriptive Analytics

Correct answer: C) KPI

WHY: KPI means a measurable indicator of performance against an objective. Roman Urdu: Is definition ka central idea KPI hai.

MENTAL MODEL: A scoreboard for a goal.

Q292. Which concept is BEST illustrated by this situation: a company tracks customer response time?

A) Predictive Analytics

B) KPI

C) Descriptive Analytics

D) Feature Engineering

Correct answer: B) KPI

WHY: This situation is an example of KPI. The key concept is: a measurable indicator of performance against an objective. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A scoreboard for a goal.

Q293. Which concept best matches this definition: estimating future values from historical information?

A) Pie Chart

B) Feature Engineering

C) Forecasting

D) Duplicate Record

Correct answer: C) Forecasting

WHY: Forecasting means estimating future values from historical information. Roman Urdu: Is definition ka central idea Forecasting hai.

MENTAL MODEL: Project the pattern forward.

Q294. Which concept is BEST illustrated by this situation: a shop predicts next month's demand?

A) Outlier

B) Prescriptive Analytics

C) Forecasting

D) Data Analysis

Correct answer: C) Forecasting

WHY: This situation is an example of Forecasting. The key concept is: estimating future values from historical information. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Project the pattern forward.

Q295. Which concept best matches this definition: difference between predicted and observed values?

A) Unstructured Data

B) Descriptive Analytics

C) Data Cleaning

D) Forecast Error

Correct answer: D) Forecast Error

WHY: Forecast Error means difference between predicted and observed values. Roman Urdu: Is definition ka central idea Forecast Error hai.

MENTAL MODEL: Measure how far the guess missed.

Q296. Which concept is BEST illustrated by this situation: a team compares forecast sales with actual sales?

A) Median

B) Business Intelligence

C) Trend Analysis

D) Forecast Error

Correct answer: D) Forecast Error

WHY: This situation is an example of Forecast Error. The key concept is: difference between predicted and observed values. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Measure how far the guess missed.

Q297. Which concept best matches this definition: processes and tools turning business data into actionable insights?

A) Data Cleaning

B) Descriptive Analytics

C) Business Intelligence

D) Structured Data

Correct answer: C) Business Intelligence

WHY: Business Intelligence means processes and tools turning business data into actionable insights. Roman Urdu: Is definition ka central idea Business Intelligence hai.

MENTAL MODEL: Make business data speak.

Q298. Which concept is BEST illustrated by this situation: a retailer uses dashboards to spot low-performing regions?

A) Business Intelligence

B) Missing Value

C) Mean

D) Predictive Analytics

Correct answer: A) Business Intelligence

WHY: This situation is an example of Business Intelligence. The key concept is: processes and tools turning business data into actionable insights. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Make business data speak.

Q299. Which concept best matches this definition: protecting sensitive information during data use and reporting?

A) Data Analysis

B) Dashboard

C) Data Privacy in Analytics

D) Pie Chart

Correct answer: C) Data Privacy in Analytics

WHY: Data Privacy in Analytics means protecting sensitive information during data use and reporting. Roman Urdu: Is definition ka central idea Data Privacy in Analytics hai.

MENTAL MODEL: Analyze patterns without exposing people.

Q300. Which concept is BEST illustrated by this situation: a hospital removes identifiers before sharing analysis?

A) Pie Chart

B) Data Privacy in Analytics

C) Dashboard

D) Forecast Error

Correct answer: B) Data Privacy in Analytics

WHY: This situation is an example of Data Privacy in Analytics. The key concept is: protecting sensitive information during data use and reporting. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Analyze patterns without exposing people.

Week 7

Q301. Which concept best matches this definition: a plan for creating and capturing value using AI capabilities?

A) AI Business Model

B) Minimum Viable Product

C) Business Validation

D) Business Model Canvas

Correct answer: A) AI Business Model

WHY: AI Business Model means a plan for creating and capturing value using AI capabilities. Roman Urdu: Is definition ka central idea AI Business Model hai.

MENTAL MODEL: How the AI venture earns its keep.

Q302. Which concept is BEST illustrated by this situation: a startup charges for an AI support assistant?

A) Market Gap

B) Business Validation

C) AI Business Model

D) Business Feasibility

Correct answer: C) AI Business Model

WHY: This situation is an example of AI Business Model. The key concept is: a plan for creating and capturing value using AI capabilities. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: How the AI venture earns its keep.

Q303. Which concept best matches this definition: an early-stage venture searching for a scalable business model?

A) Branding

B) Market Research

C) Startup

D) Competitive Advantage

Correct answer: C) Startup

WHY: Startup means an early-stage venture searching for a scalable business model. Roman Urdu: Is definition ka central idea Startup hai.

MENTAL MODEL: A new venture testing its path.

Q304. Which concept is BEST illustrated by this situation: a small team tests a new AI service?

A) Startup

B) Value Proposition

C) Competitor Analysis

D) Business Model Canvas

Correct answer: A) Startup

WHY: This situation is an example of Startup. The key concept is: an early-stage venture searching for a scalable business model. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A new venture testing its path.

Q305. Which concept best matches this definition: an unmet or underserved customer need?

A) Investor Pitch

B) Digital Marketing

C) Market Gap

D) Branding

Correct answer: C) Market Gap

WHY: Market Gap means an unmet or underserved customer need. Roman Urdu: Is definition ka central idea Market Gap hai.

MENTAL MODEL: Find the missing service.

Q306. Which concept is BEST illustrated by this situation: local shops lack affordable customer inquiry tools?

A) Startup

B) Value Proposition

C) Business Feasibility

D) Market Gap

Correct answer: D) Market Gap

WHY: This situation is an example of Market Gap. The key concept is: an unmet or underserved customer need. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Find the missing service.

Q307. Which concept best matches this definition: a problem or frustration experienced by a target customer?

A) Customer Engagement

B) Business Model Canvas

C) Customer Pain Point

D) Value Proposition

Correct answer: C) Customer Pain Point

WHY: Customer Pain Point means a problem or frustration experienced by a target customer. Roman Urdu: Is definition ka central idea Customer Pain Point hai.

MENTAL MODEL: Find what hurts the customer.

Q308. Which concept is BEST illustrated by this situation: buyers wait hours for order updates?

A) Customer Pain Point

B) Competitor Analysis

C) Customer Retention

D) Business Model Canvas

Correct answer: A) Customer Pain Point

WHY: This situation is an example of Customer Pain Point. The key concept is: a problem or frustration experienced by a target customer. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Find what hurts the customer.

Q309. Which concept best matches this definition: a clear statement of benefits delivered to customers?

A) Business Model Canvas

B) Scaling a Business

C) Value Proposition

D) Customer Acquisition

Correct answer: C) Value Proposition

WHY: Value Proposition means a clear statement of benefits delivered to customers. Roman Urdu: Is definition ka central idea Value Proposition hai.

MENTAL MODEL: Why customers should choose you.

Q310. Which concept is BEST illustrated by this situation: a chatbot promises faster support at lower cost?

A) Customer Persona

B) Business Feasibility

C) Value Proposition

D) Investor Pitch

Correct answer: C) Value Proposition

WHY: This situation is an example of Value Proposition. The key concept is: a clear statement of benefits delivered to customers. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Why customers should choose you.

Q311. Which concept best matches this definition: collecting and analyzing information about a market?

A) Revenue Stream

B) Market Research

C) Value Proposition

D) Sustainable Growth

Correct answer: B) Market Research

WHY: Market Research means collecting and analyzing information about a market. Roman Urdu: Is definition ka central idea Market Research hai.

MENTAL MODEL: Listen before building.

Q312. Which concept is BEST illustrated by this situation: a founder interviews prospective users about demand?

A) Customer Persona

B) Competitor Analysis

C) Business Feasibility

D) Market Research

Correct answer: D) Market Research

WHY: This situation is an example of Market Research. The key concept is: collecting and analyzing information about a market. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: Listen before building.

Q313. Which concept best matches this definition: a research-informed representation of a target customer?

A) Conversion Rate

B) AI Business Model

C) Risk Assessment for Startups

D) Customer Persona

Correct answer: D) Customer Persona

WHY: Customer Persona means a research-informed representation of a target customer. Roman Urdu: Is definition ka central idea Customer Persona hai.

MENTAL MODEL: A realistic sketch of a buyer.

Q314. Which concept is BEST illustrated by this situation: a team profiles a small-store owner with limited time?

A) Scaling a Business

B) Customer Persona

C) Customer Retention

D) AI Business Model

Correct answer: B) Customer Persona

WHY: This situation is an example of Customer Persona. The key concept is: a research-informed representation of a target customer. Roman Urdu: Example ko definition se match karein.

MENTAL MODEL: A realistic sketch of a buyer.

Q315. Which concept best matches this definition: evaluating alternative providers and their offerings?

A) Revenue Stream

B) Competitor Analysis

C) Conversion Rate

D) Customer Pain Point

Correct answer: B) Competitor Analysis
